01

FEATURE

Form Field Types

Provide a broad collection of standard, content, choice, file, signature, commerce and compliance fields.

- Basic: Full Name, First Name, Last Name, Email, Phone, Address, Country, State, Date, Time and Appointment.
- Content/Layout: Section Heading, Border Label, Paragraph Text and Image.
- Input/Choice: Text, Long Text, Number, Dropdown, Radio, Checkbox, Fill in the Blank and Star Rating.
- Files/Signature: Upload File and Signature.
- Commerce: Product / Product List.
- Payment & Compliance: Payment, CAPTCHA and Terms & Conditions.

02

FEATURE

Advanced Fields & Widgets

Support richer data-entry experiences with advanced controls and interactive components.

- Repeater Fields for multiple sets of related information.
- Matrix Table / Likert Scale.
- Net Promoter Score (NPS) with custom questions and labels.
- HTML Snippet Field with WYSIWYG editor.
- Embed images, videos and maps.
- Datepicker, International Telephone Input, Star Rating, Select2 and Input Mask.
- Image / icon based checkbox and radio options.
- Button-style checkbox/radio presentation and custom styling.

03

FEATURE

Multi-Page / Multi-Step Forms

Split long forms into guided pages while controlling the final submission flow.

- Create multiple form pages with one click.
- Editable page headings.
- Drag page-break markers to move split points.
- Remove page breaks to merge pages.
- Next / Back navigation on live forms.
- Payment, CAPTCHA and Terms & Conditions remain on the final page before Submit.

04

FEATURE

Conditional Logic

Create dynamic If / Then behavior based on values entered by the visitor.

- Create conditions from field values.
- Equals, Not Equals and Contains operators.
- Show or hide fields.
- Make fields required or optional.
- Mask a field based on a condition.
- Copy a value from one field into another.
- Target one or multiple fields from a rule.
- List, edit and delete configured rules.

05

FEATURE

Form Design & Branding

Customize the form appearance to match the organization's website and brand identity.

- Ready-made themes and one-click theme application.
- Custom fonts, colors, gradients and subtle patterns.
- Logo upload with adjustable dimensions.
- Stacked or side-by-side form header layout.
- Customize page/card backgrounds and accent colors.
- Customize headings, alignment, field layout and Submit button.
- Full Width / Half Width responsive field layout.
- Custom CSS styling and design reset.

06

FEATURE

Payment Integration

Support payment-enabled forms with configurable gateway and transaction settings.

- PayPal, Stripe and Square gateway support.
- Gateway-specific credential configuration.
- Sandbox / Live mode.
- Fixed or variable payment amounts.
- Currency selection.
- Product lists with multiple line items and quantities.
- Payment field configuration enforced on the final page before Submit.

07

FEATURE

CAPTCHA & Security

Reduce automated submissions and provide configurable CAPTCHA protection.

- Google reCAPTCHA with site key configuration.
- reCAPTCHA v2/v3 support as applicable to the integration.
- Built-in Image CAPTCHA.
- Invisible reCAPTCHA or “I'm not a robot” checkbox.
- Multiple CAPTCHA theme options.
- Only one CAPTCHA field per form, automatically placed on the final page.

08

FEATURE

Terms & Conditions

Require visitor acceptance before final form submission.

- Display Terms & Conditions as typed text.
- Use an external Terms URL.
- Upload a Terms & Conditions PDF.
- Mandatory acceptance checkbox.
- Prevent submission until acceptance is completed.
- Keep Terms & Conditions on the final page before Submit.

09

FEATURE

Form Submission Management

Manage and review information submitted through published forms.

- View submitted form data.
- Search and filter submissions.
- View submission details.
- Manage submission records.
- Export submitted data.
- Submission status management.
- Email notifications after submission.

10

FEATURE

Role-Based Access Control

Secure administrative access using roles, permissions and a controlled user access lifecycle.

- Super Admin has full access to Form Builder features and settings.
- Site Admin access is limited to capabilities explicitly granted by Super Admin.
- Control access to selected modules and features.
- Control Add, Edit, View and Delete permissions.
- Control access to analytics, reports, forms, settings, design and payment administration.
- Role-based access applies to administration and permitted Form Builder operations.
- Integrate access lifecycle into role-based control: Pending, Active, Expired or Disabled.

11

FEATURE

Automatic Access Expiration & Login Control

Automatically close protected administrator access when a user's permitted access period ends.

- Pending users cannot access the administrator area before activation.
- Active users can access assigned roles and permitted modules during the configured period.
- Expired users cannot log in to the administrator area.
- Expired users cannot access protected Form Builder features or assigned admin modules.
- Existing sessions should be rejected / invalidated once expiry is detected.
- Display a clear access-expired message.
- Super Admin can review and manage users by lifecycle state.

12

FEATURE

Application Settings

Manage core website branding, communication integration, contact information and centralized application security settings.

- Centralized website/application settings management.
- Upload and update the website/company logo.
- Manage website branding.
- Update and manage the Brevo API Key.
- Configure the website name.
- Manage website contact email addresses.
- Manage website phone numbers.
- Provide a CAPTCHA / reCAPTCHA Site Key option in Application Settings.
- Configure and maintain the reCAPTCHA Site Key centrally for applicable forms.

13

FEATURE

Form Administration

Manage the complete lifecycle of forms from the administration area.

- Create, edit and delete forms.
- Duplicate existing forms.
- Activate / deactivate forms.
- View and manage form listings.
- Search and filter forms.
- Manage form status.
- Manage form configuration.
- Apply form access permissions.

14

FEATURE

Thank You Pages

Provide a configurable confirmation page after successful form submission.

- Create and configure custom Thank Pages for individual forms.
- Select and use ready-made / sample Thank Page templates.
- Customize Thank Page heading, success message, description and branding.
- Add images, buttons, links and other content to the Thank Page.
- Apply responsive CSS styling for Desktop, Tablet and Mobile views.
- Preview the Thank Page before publishing the form.
- Automatically display the configured Thank Page after successful submission.

15

FEATURE

Mail Templates & Mailing Services

Provide separate email services and configurable templates for administrators and form users.

- Admin Mailing Service: send notification emails to administrators after form submission.
- Create and customize admin mail templates with subject and message content.
- Include submitted form values using template fields / placeholders.
- Provide sample admin mail templates showing how submission emails are sent.
- User Mailing Service: send confirmation emails to users after successful form submission.
- Create and customize user mail templates with subject and message content.
- Include relevant submitted form values using template fields / placeholders.
- Provide sample user mail templates showing how confirmation emails are sent.
- Support text-based email templates for both admin and user mailing services.
