How to access the Admin Login?

1. **Navigate to the Login Page:** Open your preferred browser and access the login page for the Admin portal.

SC-(01) - Login Page

2. **Enter Your Credentials:**

- **Email Address:** Provide the registered email address associated with your admin account.
- **Password:** Enter the password associated with your email address.

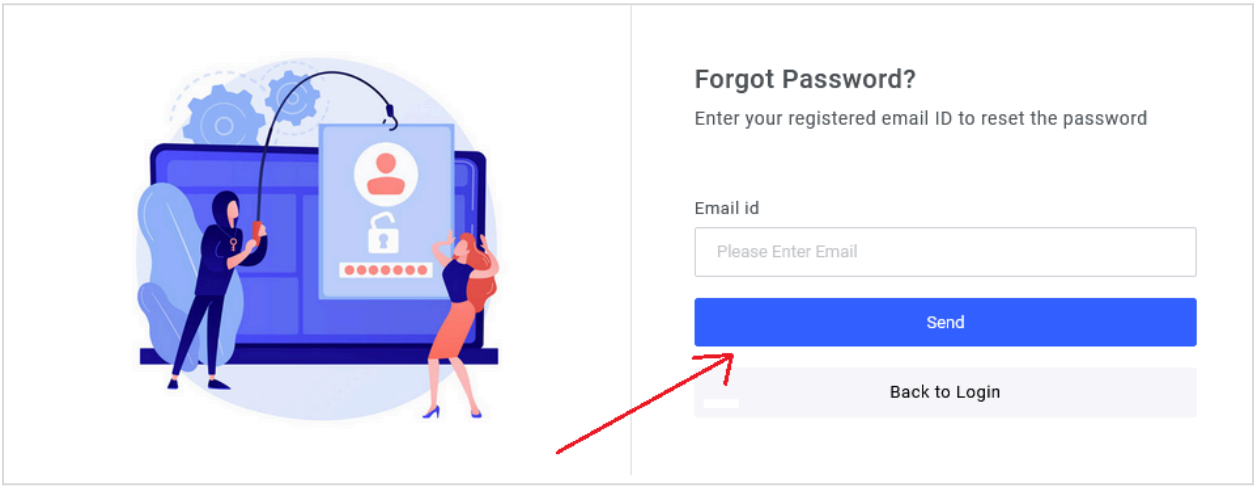

3. **Log In to Your Account:**

- Once you've entered your credentials, click on the **Sign in** button.

- If the credentials are valid, you'll be redirected to the Admin Dashboard, where you can access all administrative tools and features.

4. **Forgot Your Password?**

- If you forget your password, click on the **"Forgot Password"** link on the login page. You will be redirected to the **"Forgot Password"** page.

- Enter your registered email ID and click "**Send**." A notification will be sent to your registered email account.

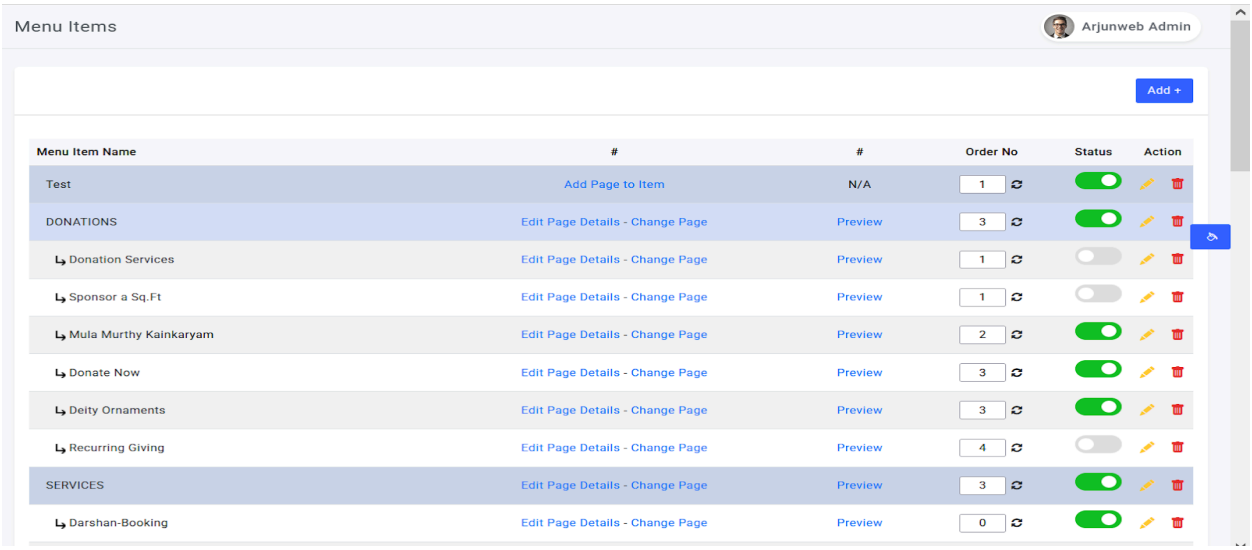

How to add menu items?

When you add a **Menu item** in the admin panel, it will be reflected in the front-end user view. The user-side menu items will appear as shown in the image below.

User Screen:

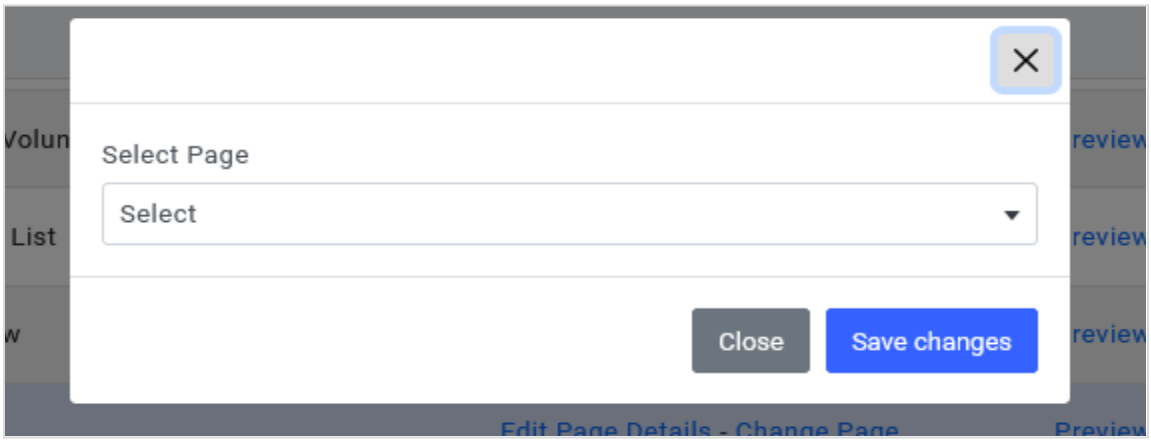

Control Panel Screen:

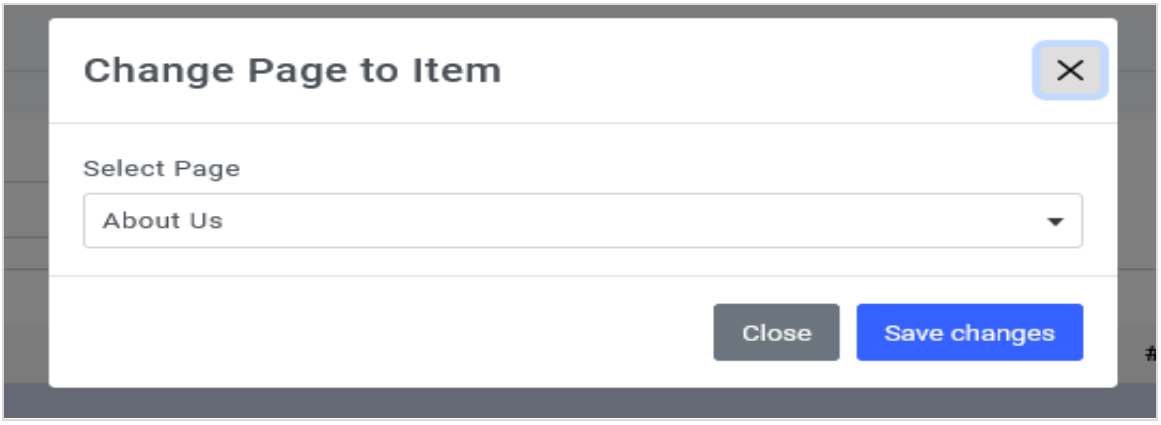

1. The "**Menu Items**" section in the admin panel allows you to add & manage menu drop downs.
2. **Menu Items List:** Shows all menu items . You can create **parent** and **child menu** items, with child items nested under their parent. On the **user side**, a drop down displays the **child items under the parent menu**.
3. **Add Page to Item:** This option allows you to link a page to a menu item. Without linking a page, the menu item will not be displayed in the header.

   By clicking on this, a **popup window** with **dropdown (select page)** will appear where you can select any page you want to assign.

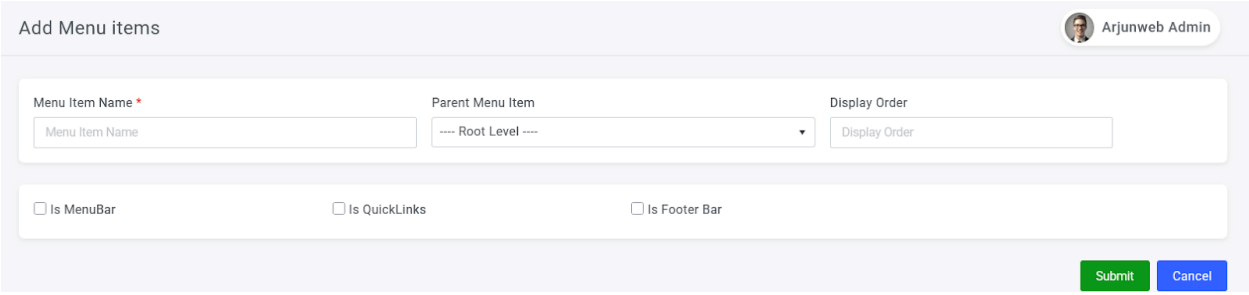

4. **Edit Page Details:** The **Edit Page Details** will allow you to **edit or modify** the details as needed.
5. **Change Page:** allowing you to **select and change** the assigned page.

6. **Preview:** Allows you to preview the page linked to a menu item to ensure it is displayed correctly.
7. **Edit Icon:** This view allows you to modify the details of a menu item or its associated page.
8. **Delete Icon:** Used to remove a menu item that is no longer needed..

The **Add Menu Item** button takes you to the add view, allowing you to add a new menu item.

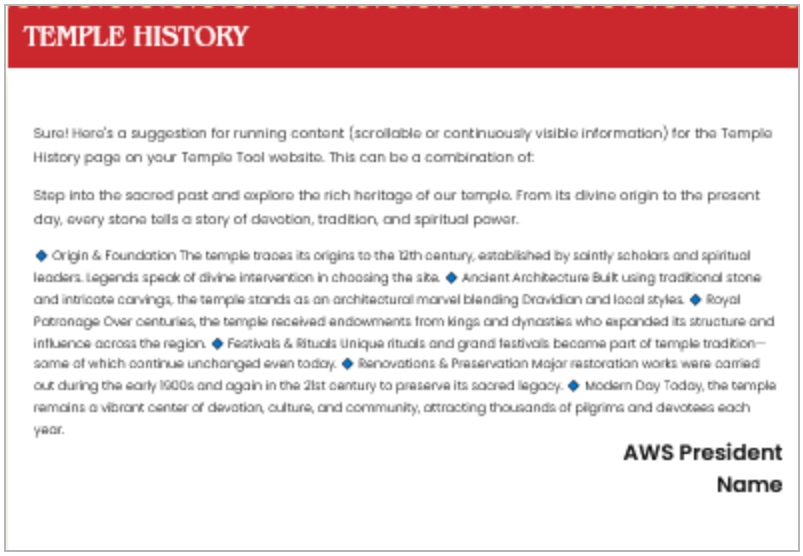

1. There is a **highlighted portion** under the fields that plays an important role in determining where the menu item should be displayed. It decides whether the menu item appears in the menu bar or the footer bar.
2. By entering all the details in the view, you can simply click the **Submit** button. This will save the record and redirect you to the **Menu Items List**.

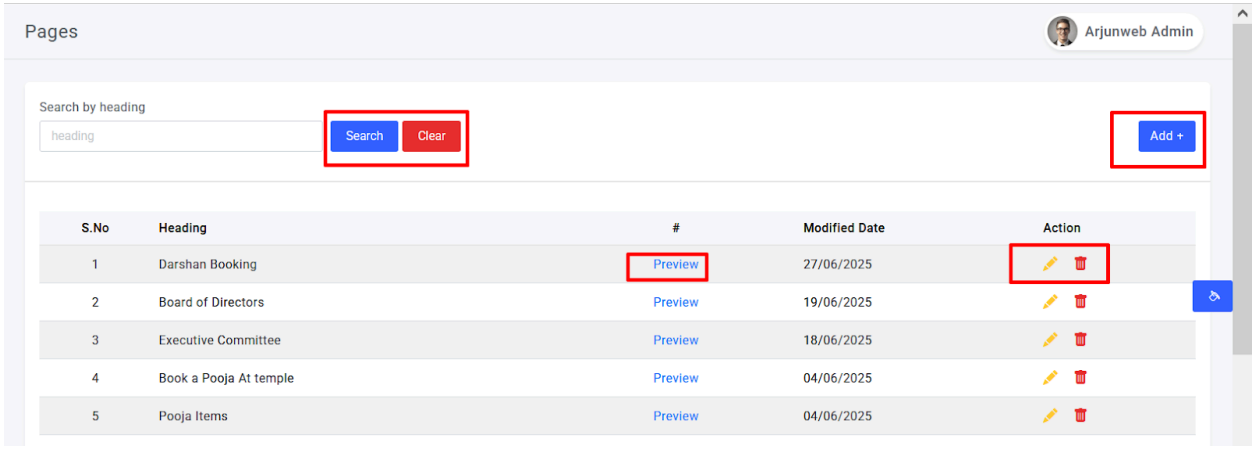

How to add running content in Internal pages?

By adding inner pages in the admin panel, they will be reflected in the user view, appearing as pages like the "**Temple History**" example shown below.

User Screen:

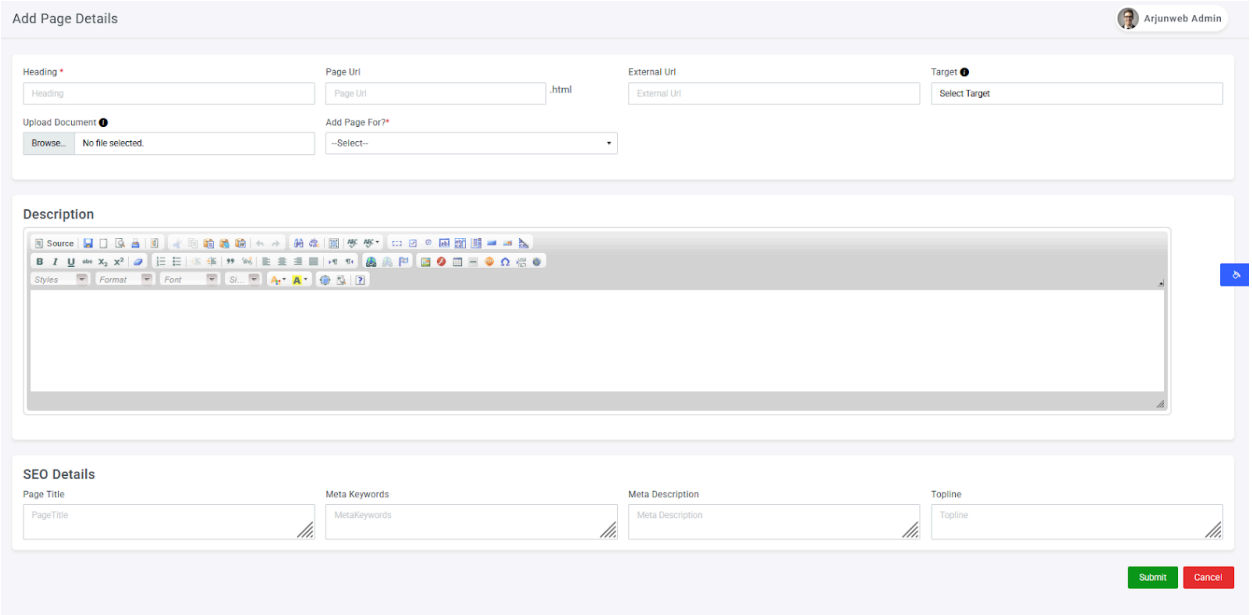

Control Panel Screen:

1. The **Search** field allows you to filter menu items based on the entered text.
2. The **Clear** button removes the entered text and restores the full list of menu items.
3. The **Add +** button redirects you to a new view called the **Add View Page**.
4. In the list, the Highlighted Text **Preview** is a **hyperlink** that redirects you to the corresponding **web page** / **running content** page.
5. **Edit Icon:** This view allows you to **modify** the details of a **menu item** or its associated page.
6. **Delete Icon:** Once deleted, the **page** will no longer appear in the front-end view..

This is the view displayed when you click the **Add Page Details** button.

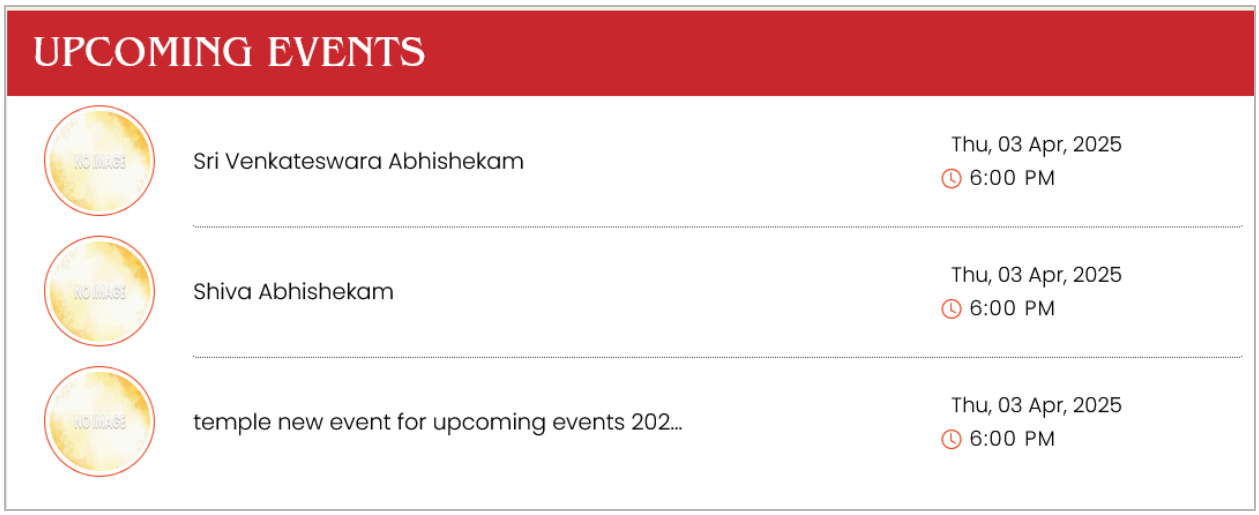

1. The '**Heading**' text box is used for the title.
2. The '**Page URL**' text box is used to enter the URL (By **default** page urls will be **auto populated** based on the name of the page).
3. The '**Target**' text box specifies the page, either **'Blank'** or **'Parent'**
4. When we select the option as **add page for ,** it will display 3 options (only page , existing menu , new menu item)
5. The '**Description**' text area is used to enter the page description

How to add Events and the process of publishing events?

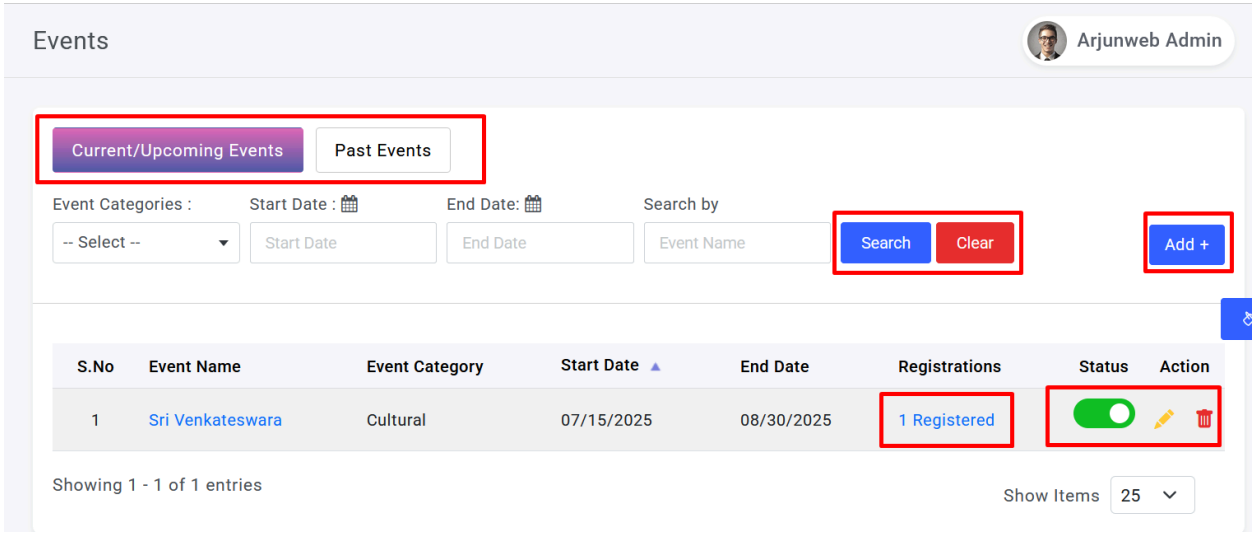

Managing Menu Pages/Events/Committees/Sponsors :

Events are scheduled activities or occurrences, such as **cultural programs, special occasions, or notable/unforgettable/memorable things happening**. They can be categorized as:

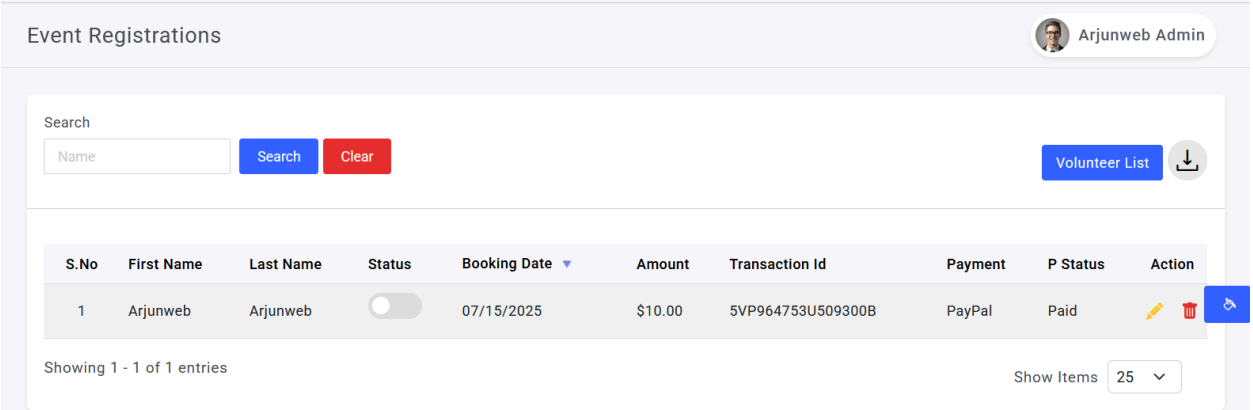

User Screen:

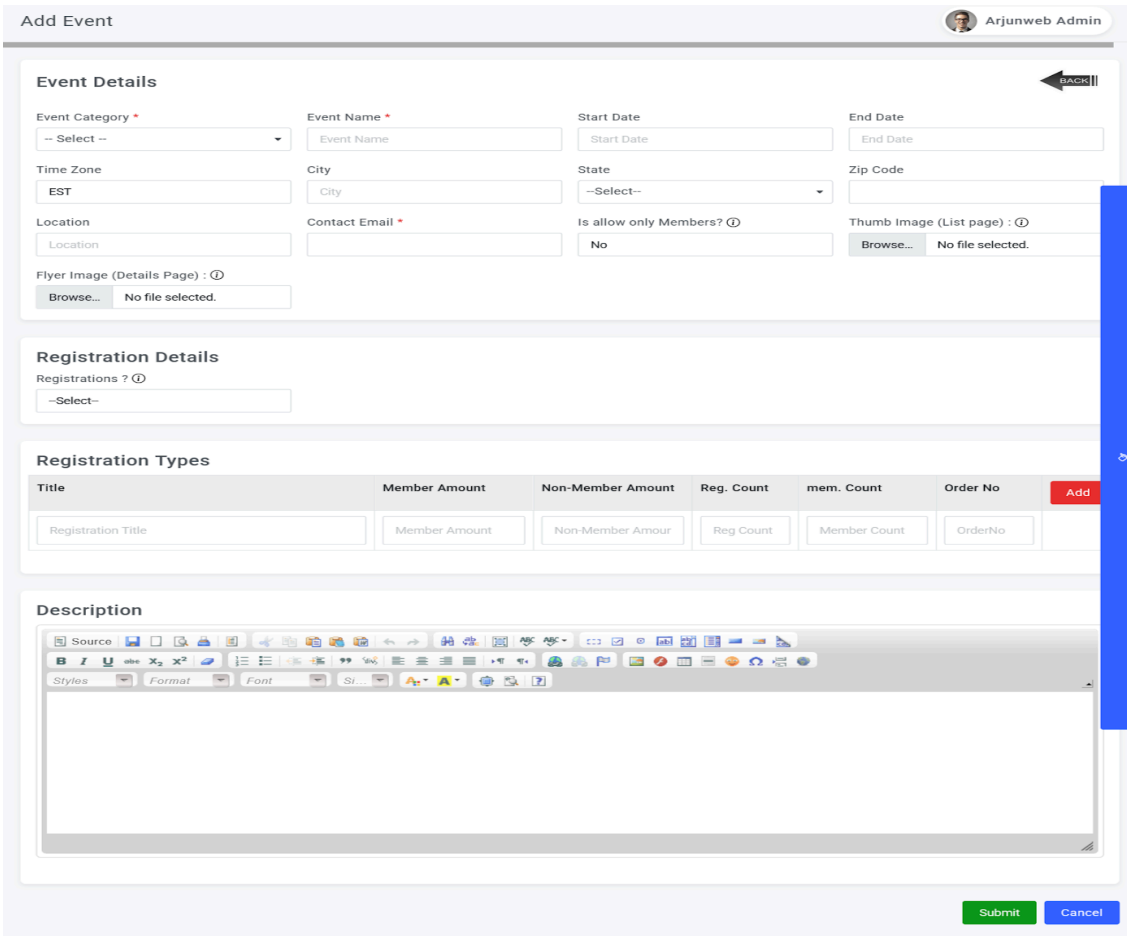

Control Panel Screen:

1. Use the **Current/Upcoming Events** button to display ongoing and upcoming events.
2. **Search Box:** Enter text to search and filter events by their details.
3. Click the **Add +** button to open the **Add Event Page** and create a new event.
4. Use the **Status Switch** to Disabled events will not appear on the front-end view.
5. **Edit Icon:** Redirects to a view for modifying the selected item.
6. **Delete Icon:** Deletes the selected record after confirming the action via an alert.
7. Registration Url shows the list of Event User registrations

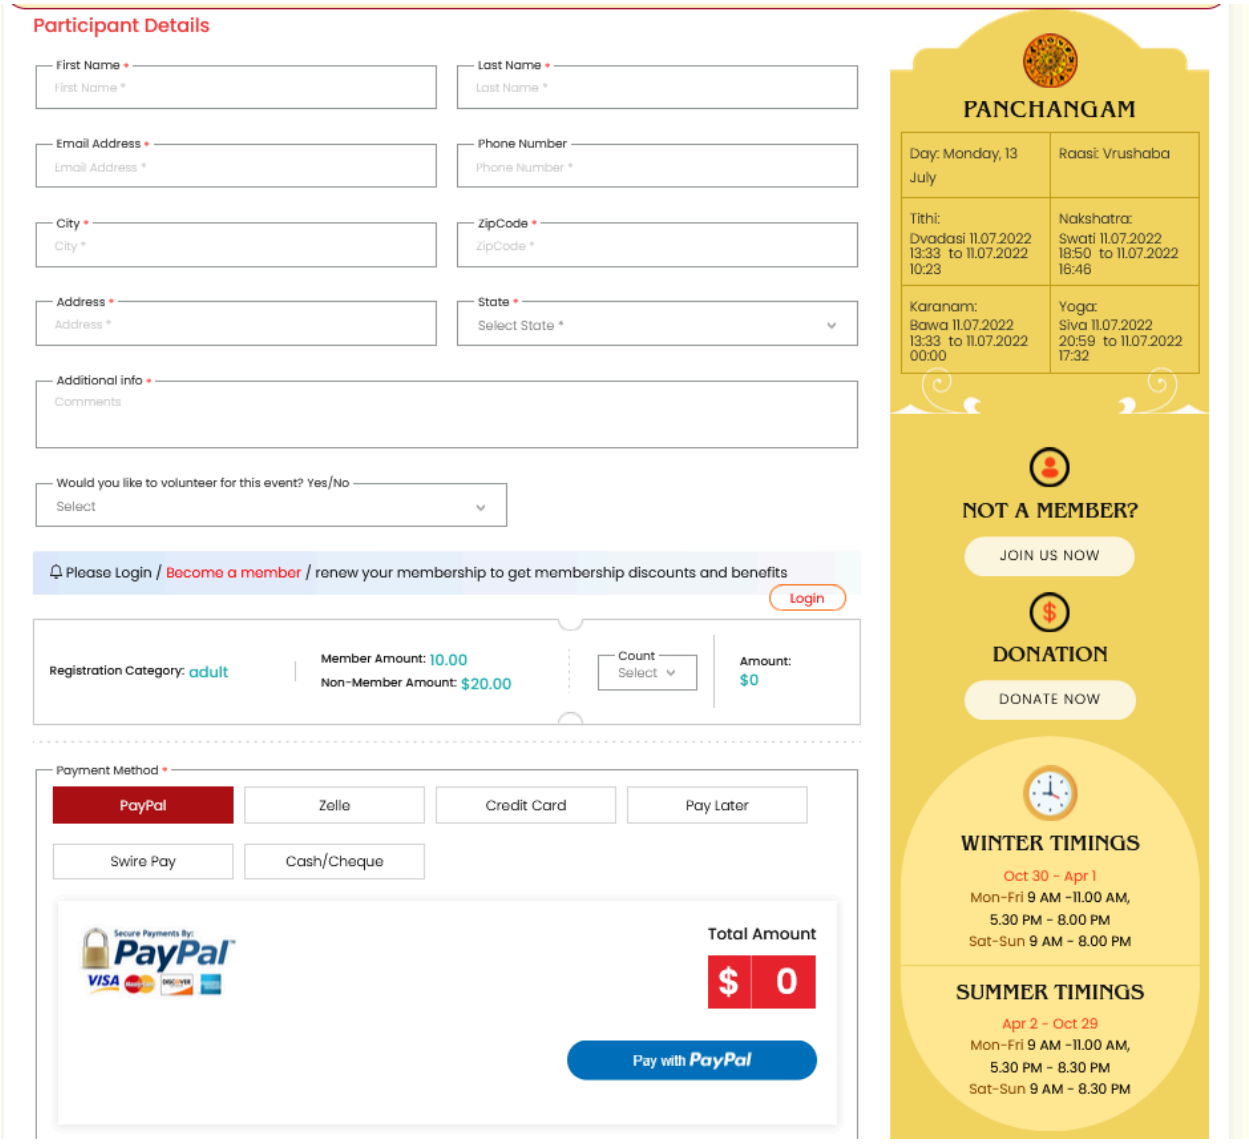

Below inserted screen used to create **upcoming/past** events:

1. **Select the Event Category (Type)** and enter the **Event Name**.
2. Ability to adjust **Events & Registration** - **Start & End Date** including **Timestamp** along with other basic details, such as the **Location** where the event is being held (Display events that are **ongoing or currently available** for registration based on **Dates)**.

3. **Upload an Image**, such as a flyer for the event.
4. **Public/Private Event (Is allow only members):** Choose whether the event is open to everyone or for only Members.
5. **Registrations ?:**
    - ➔ External Registration:If the event uses a Google Form or any third-party URL, we allow them to specify: **Reg. Url, Start Date & End Date**.
    - ➔ Internal Registration: For registrations managed within the portal, we provide options to configure: **Reg.Required?, Reg.Start Date, & End Date**.
    - ➔ When checked, additional fields for configuring the early bird become active.
6. Finally, enter the **Event Description**, which provides detailed information about the event.

Ticket Booking and User Management:

1. **User Authentication and Mandatory Details (If the event is only for Members):** Users are required to log in or provide mandatory details (Name, Phone Number, and Email ID) for each ticket purchase.
2. **Member Information Linking:** If the user is a member and logs in, the corresponding member information should be linked to the ticket.
3. After filling out all the mandatory information, proceed to the **payment gateway** of your choice to purchase the ticket.
4. The system will generate and send an email to the user with ticket details after a successful purchase.
5. Each ticket will have a unique **Ticket ID and QR Code** which will be attached to the emails which we have received from the website.
6. The registration team should be able to use **QR scanners** at the event venue to check in attendees.
7. Cultural admin will verify and update the **check-in status** for events which are organized.

How to Manage and Process General Donations?

Users can make donations using the **Donate Now** form. All registered donation details will be listed in the **Donors List** in the control panel.

1. Search and Filter options by using **cause, pay.mode, date range etc.,** to search for specific donations.
2. The **Export Details to Excel** button enables you to download the filtered data. Upon clicking, the data will be saved in an `.xlsx` format and can be found in your file explorer folder.
3. **Edit Icon**: Clicking the **Edit** icon will redirect you to a new view where you can modify the selected donation record.
4. **Delete Icon**: Clicking the **Delete** icon will prompt a confirmation alert. If you wish to cancel the deletion, you can choose to cancel the operation.

How to manage and process Service based Donations and also adding services into cart?

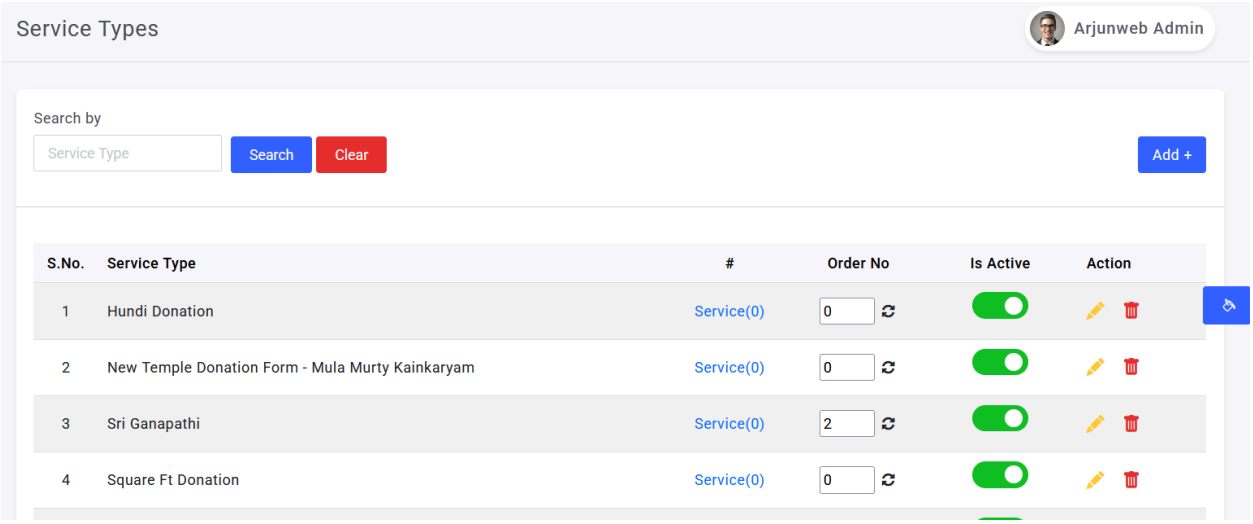

In this **donation section**, the process is different from regular donations. Here, you donate **based on items** added to the **cart**. All selected items are listed in the **cart**, and their total cost is calculated into a **single donation amount**, which needs to be paid in full.

These are the **listed items** displayed in the **user form**. In this section, you can **add** the item **name, amount**, and other necessary **details**.

How to Add Services in the Donations Section:

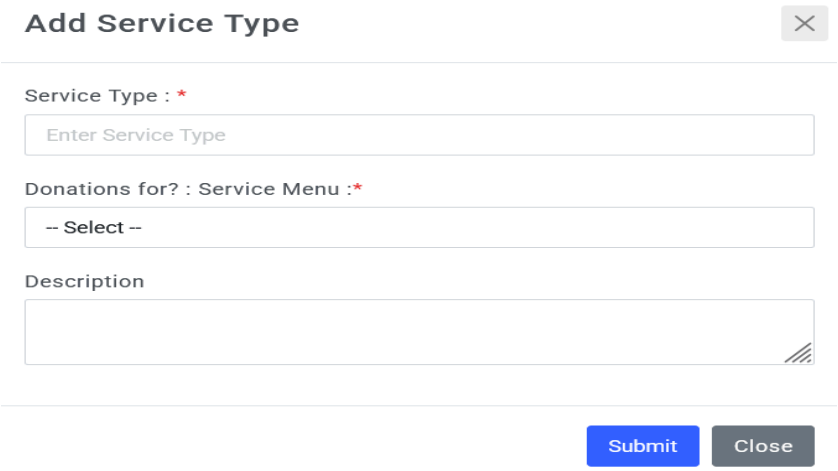

Step 1: Add Service Types

1. Navigate to **Donations → Service Types** in the left-side menu.

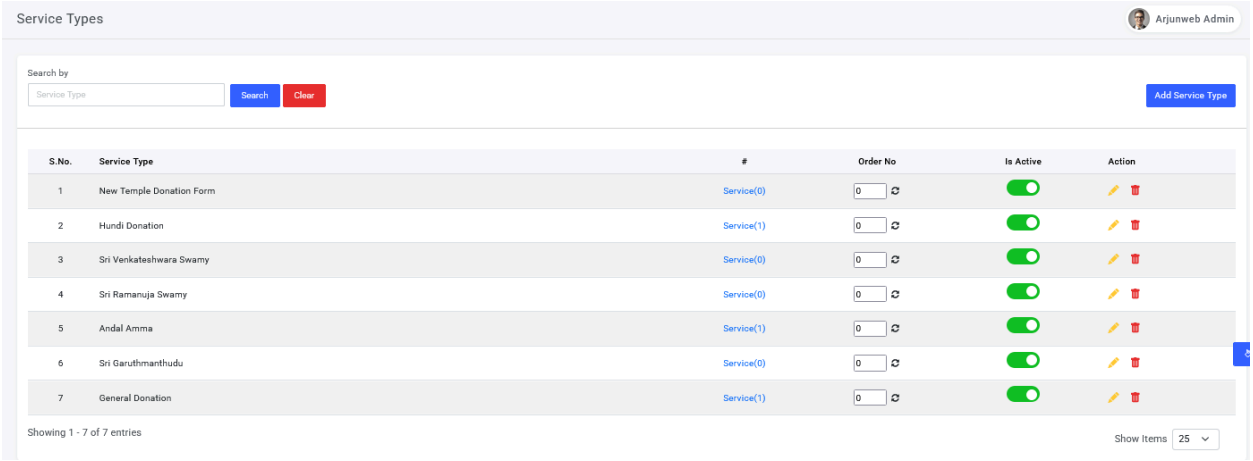

2. Click the **"+" Add New button** (if available) or fill in the necessary fields to add a new type.
3. Enter the **Service Type Name** (e.g., *Hundi Donation*, *Deity Ornaments*).
4. Set the **Order No** to control the display order on the site.
5. Toggle the Is Active switch to enable or disable this service type.
6. Use the **edit** ✏️ **or delete** 🗑️ icons to update or remove entries.
7. This acts as a **category** under which donation services will be grouped.

Step 2: Add Service Types / Categories

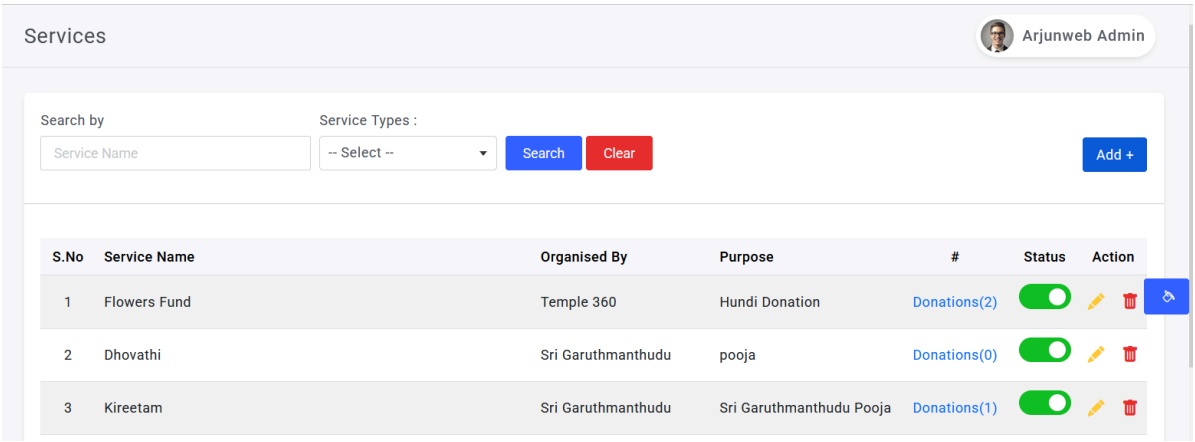

1. Choose the related **Service Type** from the dropdown.

2. Provide a meaningful Service Type Name **(e.g., *Online Hundi*, *Festival Ornaments*).**
3. Set the **Order No** and enable the Is Active status.

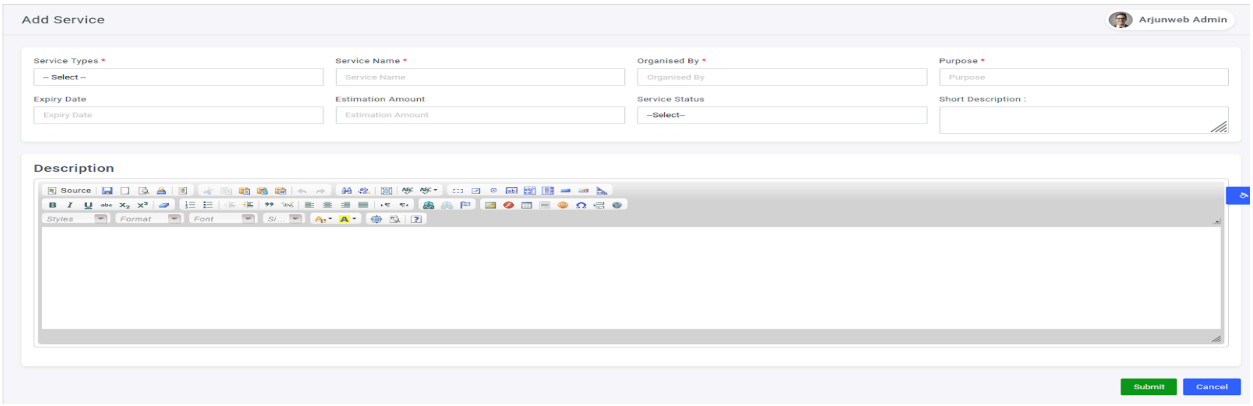

Step 3: Add Individual Services

1. Go to **Donations → Services**.

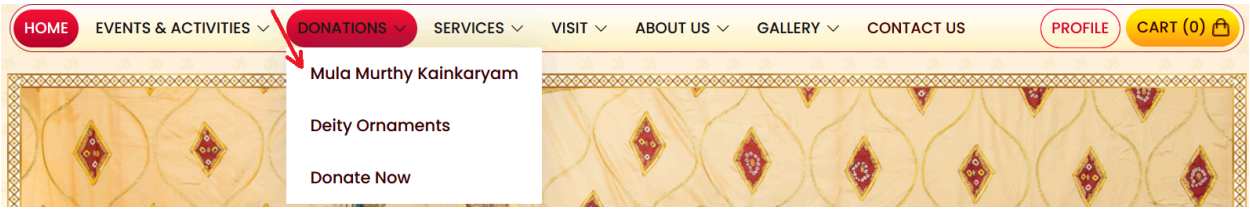

2. Click the **"+" Add New button** (if available) or fill in the necessary fields to add a new type.

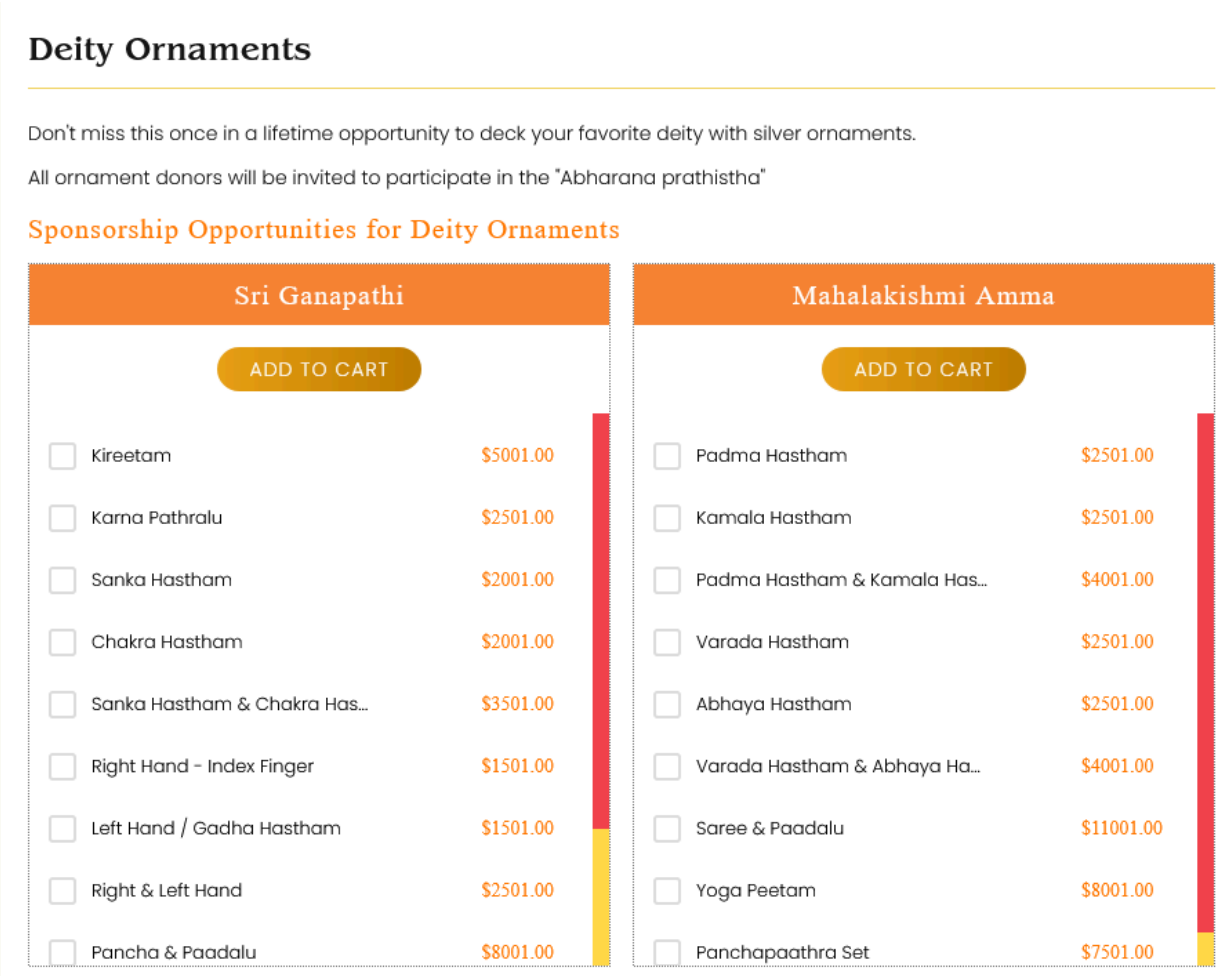

3. Select the appropriate **Service Type** ,Fill in the **Service Name, Description, Amount**, and any other necessary details.
4. Set the service as **Active** and define display order if applicable.

The **Master Service** Types will appear as menu headers on the user site:

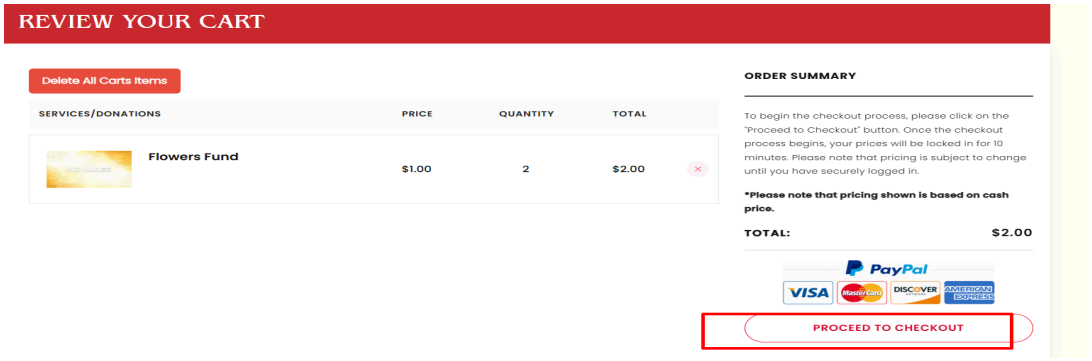

Under each, the Service Types act as sub-sections, Each Service will be listed with its title, price, and donation button.

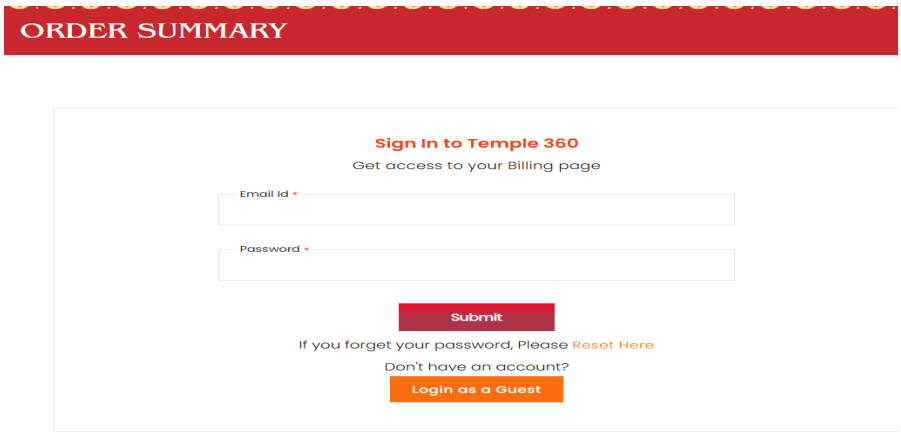

The **Deity Ornaments** section provides users an opportunity to contribute by sponsoring silver ornaments for various deities:

Each deity is presented in a **card layout** (e.g., *Sri Ganapathi*, *Mahalakshmi Amma*), containing:

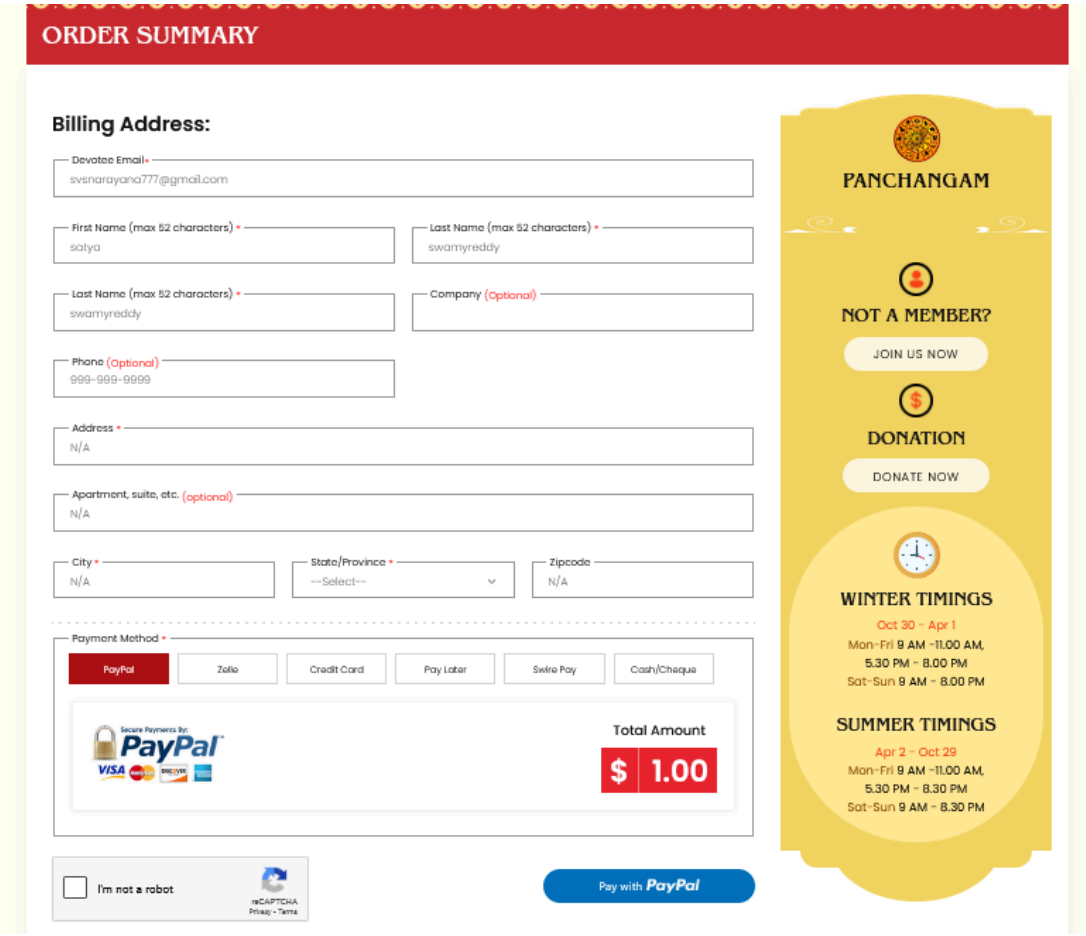

1. **Review the list** of available items under each deity.
2. **Select one or more** items by ticking the checkboxes.
3. Click the **"Add to Cart"** button at the top of the respective deity section.
4. Review the total amount for all cart items. If you'd like to make a donation, click the '**Proceed to Pay**' button.

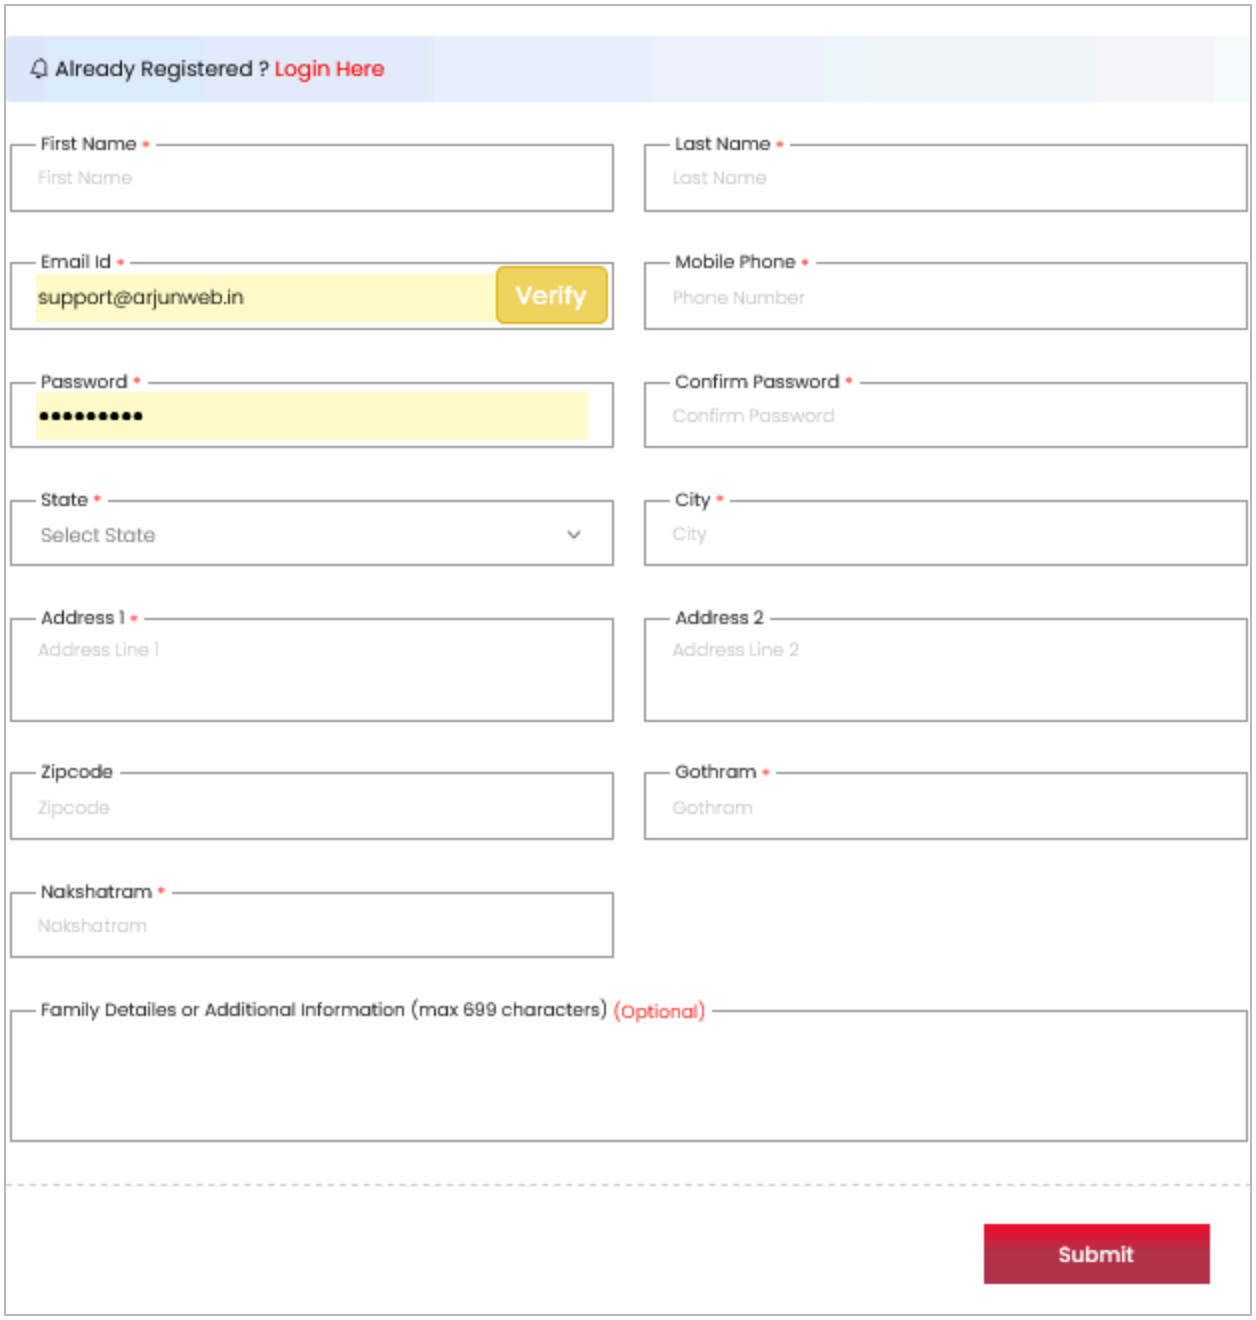

5. Click '**Proceed to Checkout**' to go to the order summary page. If you already have login credentials, go to the payment section. If you don't have login credentials, choose the '**Guest Details**' option, and then proceed to the payment section.

6. Complete the payment to confirm the donation.

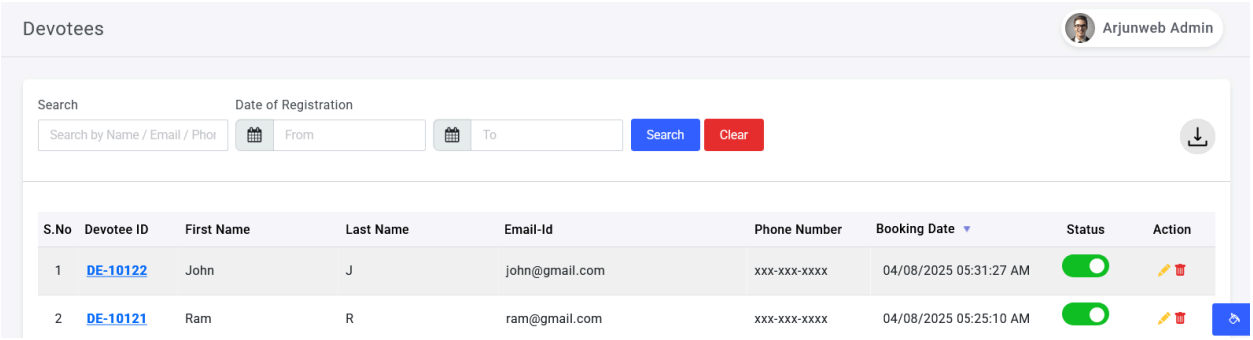

How do we maintain Temple Devotees, Devotee Profiles, and Facilities?

SC-(04) - Become a Devotee

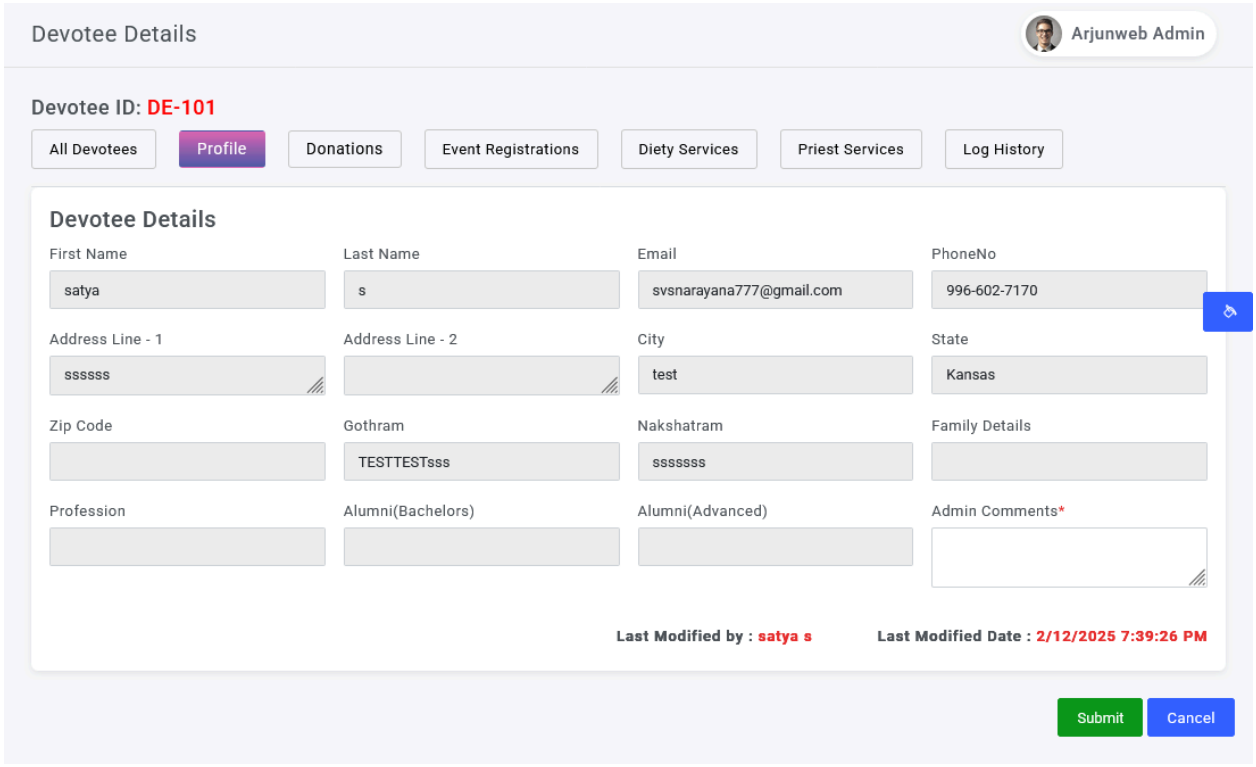

SC-(04) will assist you in becoming a devotee by entering all the mandatory fields. By registering as a devotee, you will gain access to additional benefits, including:

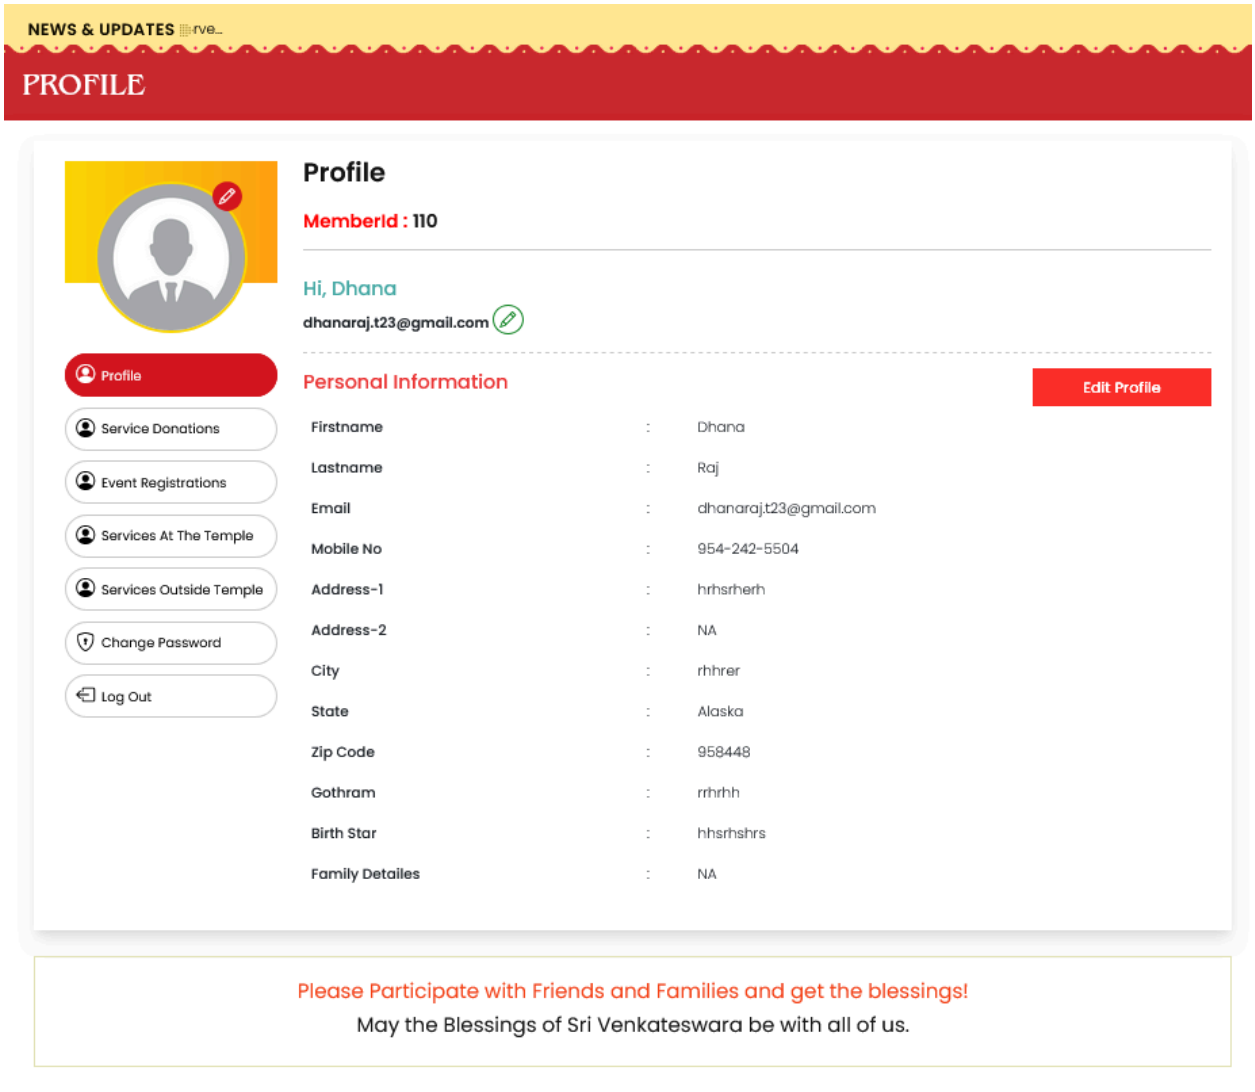

- **Event ticketing discounts**
- **Early offers**
- **Promo codes**

1. Search and Filter options by using **keyword search & date range etc.,** to search for specific Devotees.
2. The button labeled **Export to Excel** is used to **download data**. When clicked, the data will be saved in an "`.xlsx`" format and can be found in your file explorer folder.
3. When you click the **Clear** button, all entered text, selected dropdowns, and applied filters will be removed, and the complete list will be displayed.
4. **Status Switch Button:** Allows you to toggle the status of a devotee.
5. **Edit Icon:** Redirects to a view for modifying the selected item.
6. **Delete Icon:** Deletes the selected record after confirming the action via an alert.

There is a **hyperlink** in the list that redirects you to the **devotee's details** based on their **unique Devotee ID**. This view includes records of **donations, event registrations, deity services, priest services,** and **log history** in a **tab section**. Simply click on the respective **button** to view the available details.

SC-(05) - Devotee Profile Page

SC-(05) here are some **user guide points** you can include to help users understand how to navigate and use their profile effectively:

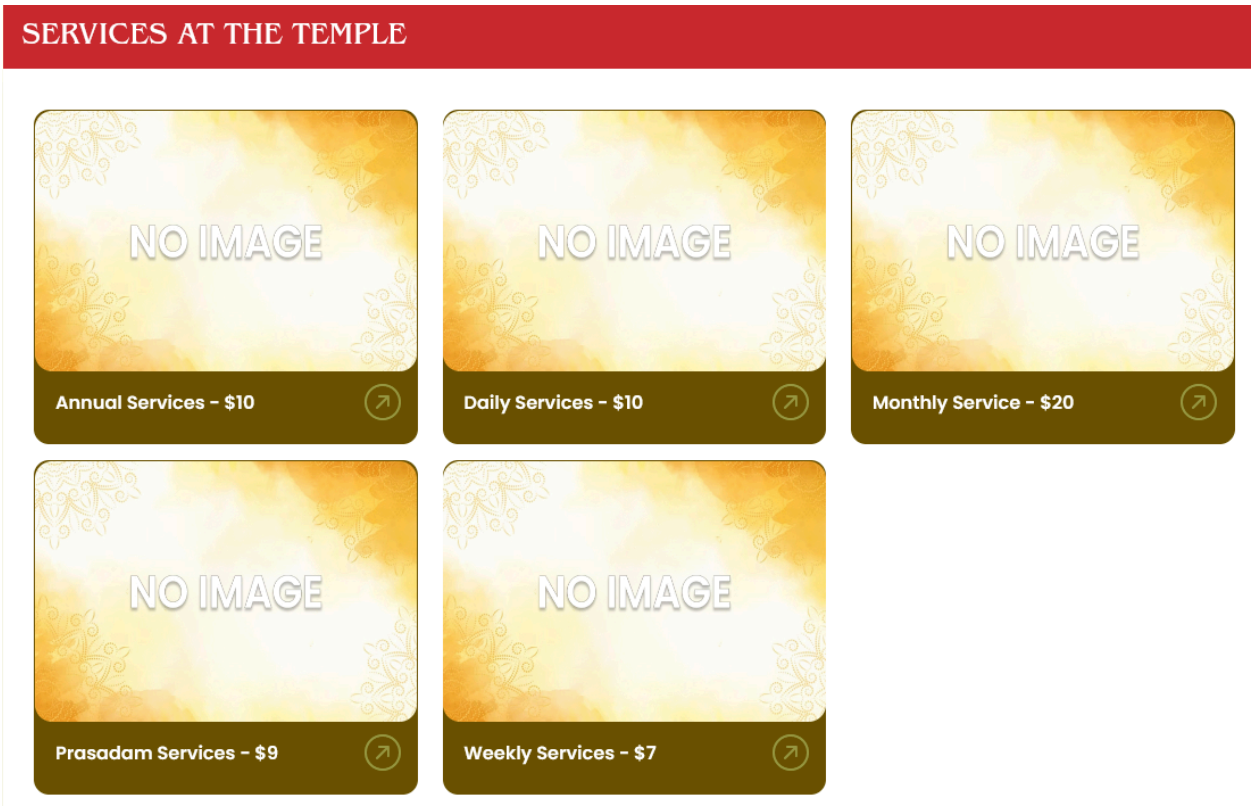

1. Displays the basic user information such as **Devotee ID**, **Name**, and **Email**...etc.,
2. Allows quick access to personal information like mobile number, address, and birth details.
3. Click the **Edit Profile** button to update personal information such as your name, email, address, and birth details.
4. **Service Donations**: Check your history of temple donations.
5. **Event Registrations**: View and manage events you've registered for.
6. **Services At The Temple**: Book or view services offered within the temple premises.
7. **Services Outside Temple**: View services or rituals conducted outside the temple.

8. **Change Password**: Securely update your login password.
9. **Log Out**: Safely exit your session.

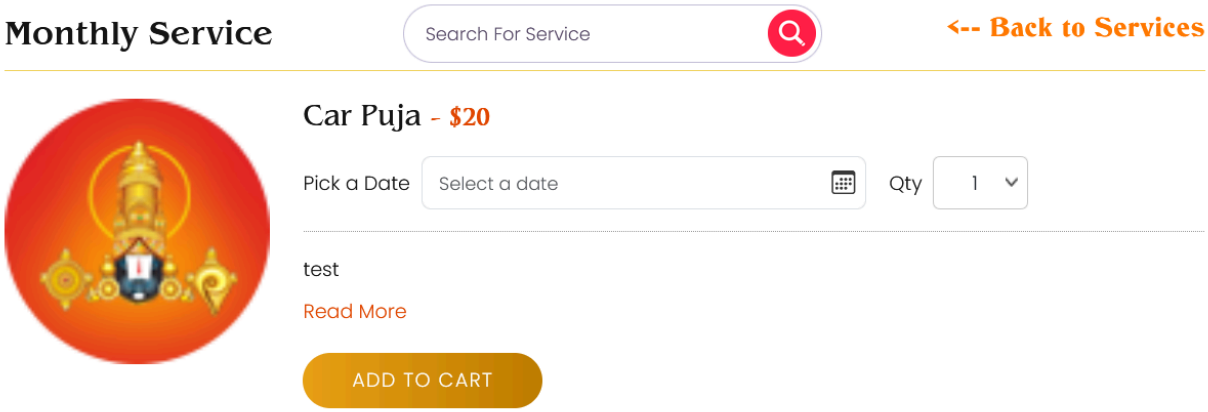

How do we manage Deities and their associated services in the temple?

This module allows the admin to create, manage, and organize temple services, ensuring they are properly displayed and easily accessible to users looking for information about the services offered at the temple.

User Screen:

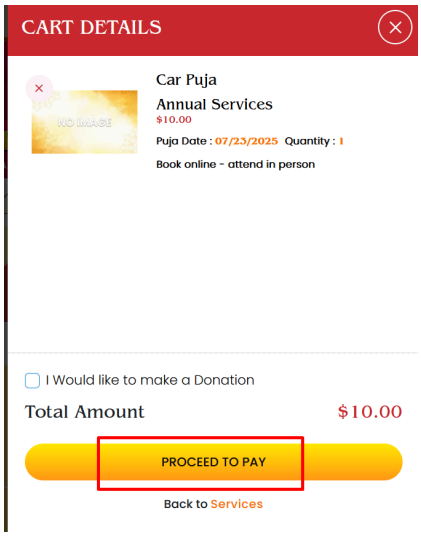

The displayed services represent the offerings provided by the temple. Clicking on a service opens it in a new tab, showing its details. In this view, you can select the date and quantity for the chosen service.

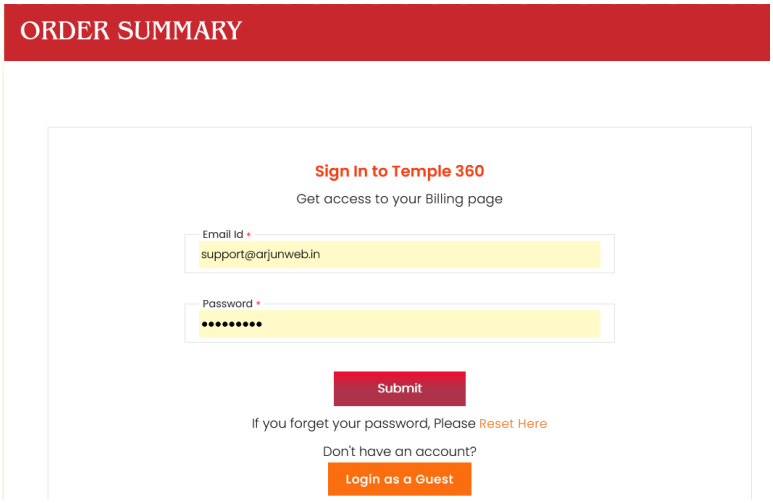

Carting

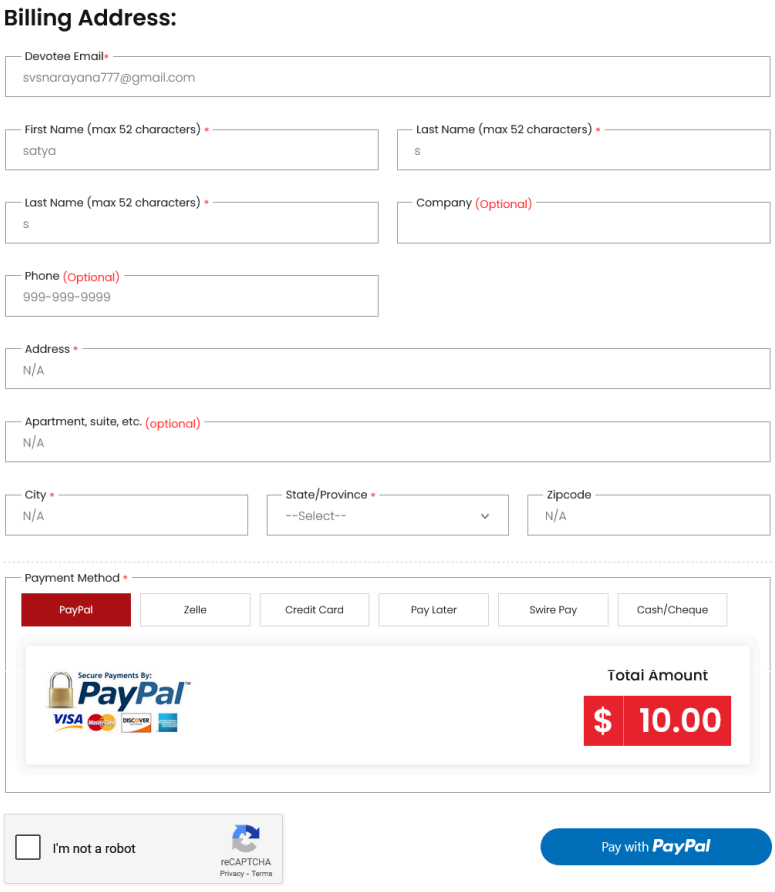

1. Review the list of available items under each deity.
2. Select one or more items by ticking the checkboxes.
3. Click the "Add to Cart" button at the top of the respective deity section.
4. Review the total amount for all cart items. If you'd like to make a donation, click the 'Proceed to Pay' button.

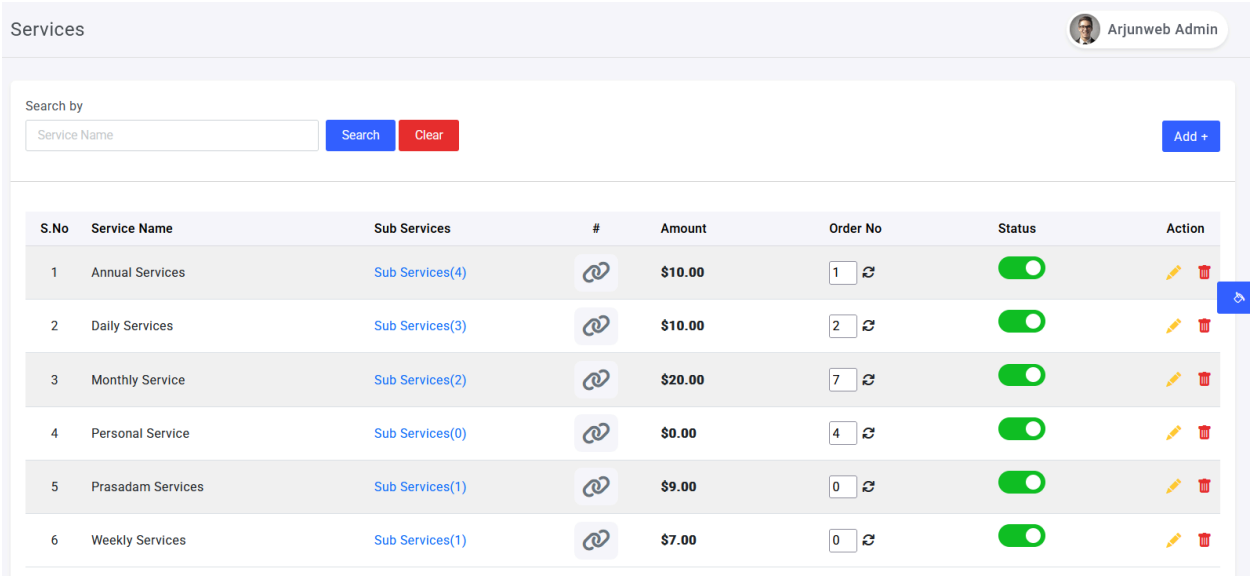

5. Click 'Proceed to Checkout' to go to the order summary page. If you already have login credentials, go to the payment section. If you don't have login credentials, choose the 'Guest Details' option, and then proceed to the payment section.

6. After that login Its go to billing

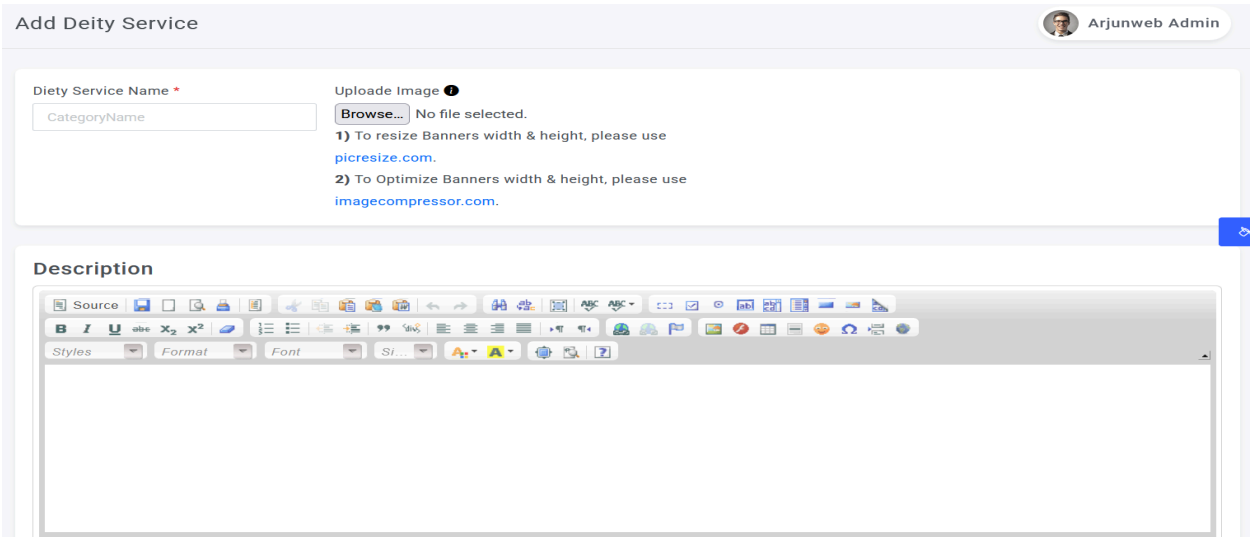

Control Panel Screen:

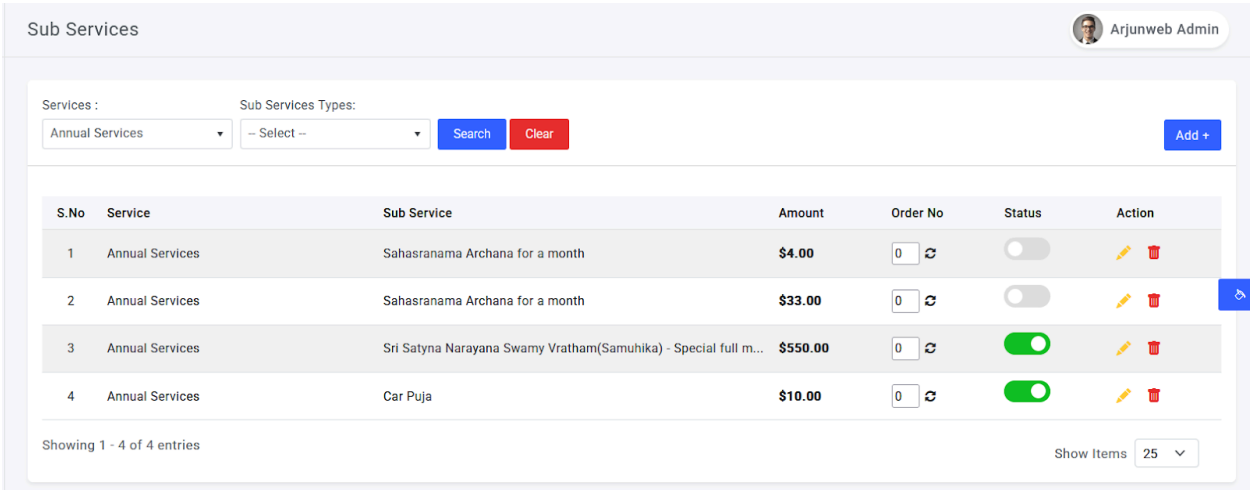

1. **Search Box:** Enter text to search and filter events by their details.
2. Click the **Add** + button to open the **Add Service** and create a new Service.

Add Service : This is the view displayed when you click the Add Deity Service.

1. Enter the name of the deity service as per your preference. This will help users identify the service easily.
2. You can upload an image related to the service to provide a visual representation for users.
3. If you want to provide more details about the service, you can enter a description explaining its purpose, significance, or any other relevant information.

Sub Services (Hyperlink) :

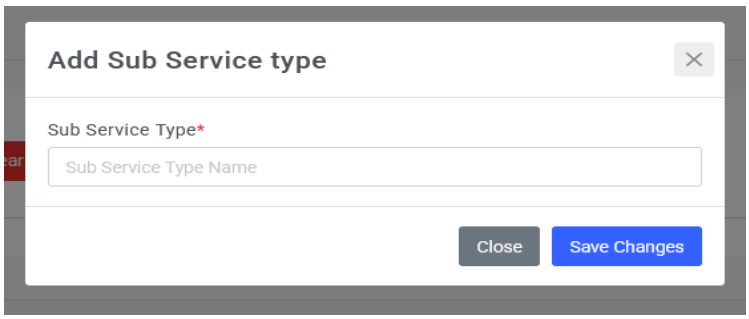

This module consists of sub-services types that are assigned to specific services, allowing for better organization and easy access to related offerings.

1. The **Search** button allows you to filter and find the specific sub-service types you need.
2. Clicking the **Clear** button will remove the search filters and display all available data.

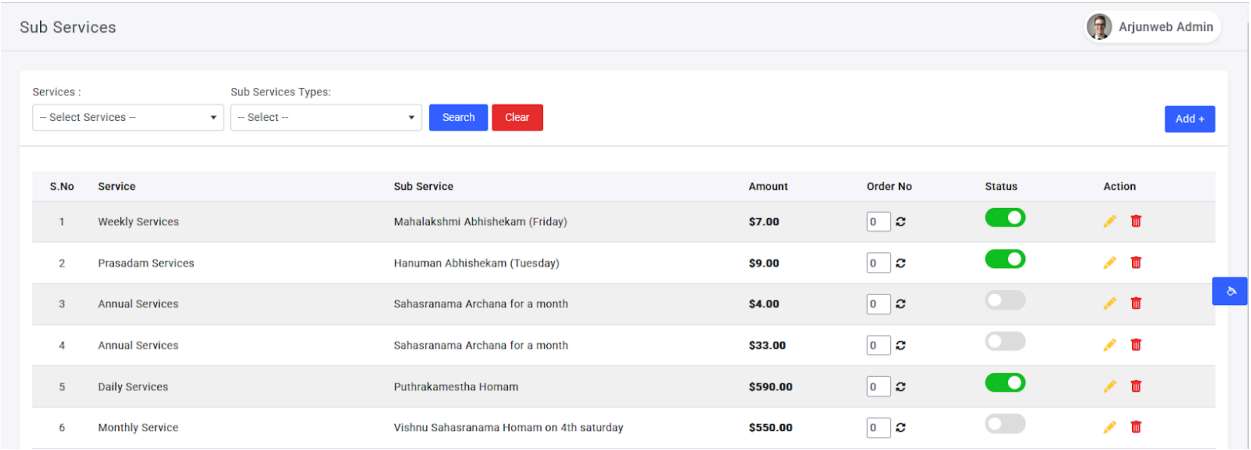

The **Add sub-services type** button will redirect you to the new page called the **Add sub-service**.

1. In the **Add Sub-Service Type** section, you need to enter the name and description as you want them to be displayed.
2. While adding a service type, you can view all the existing ones in the list.

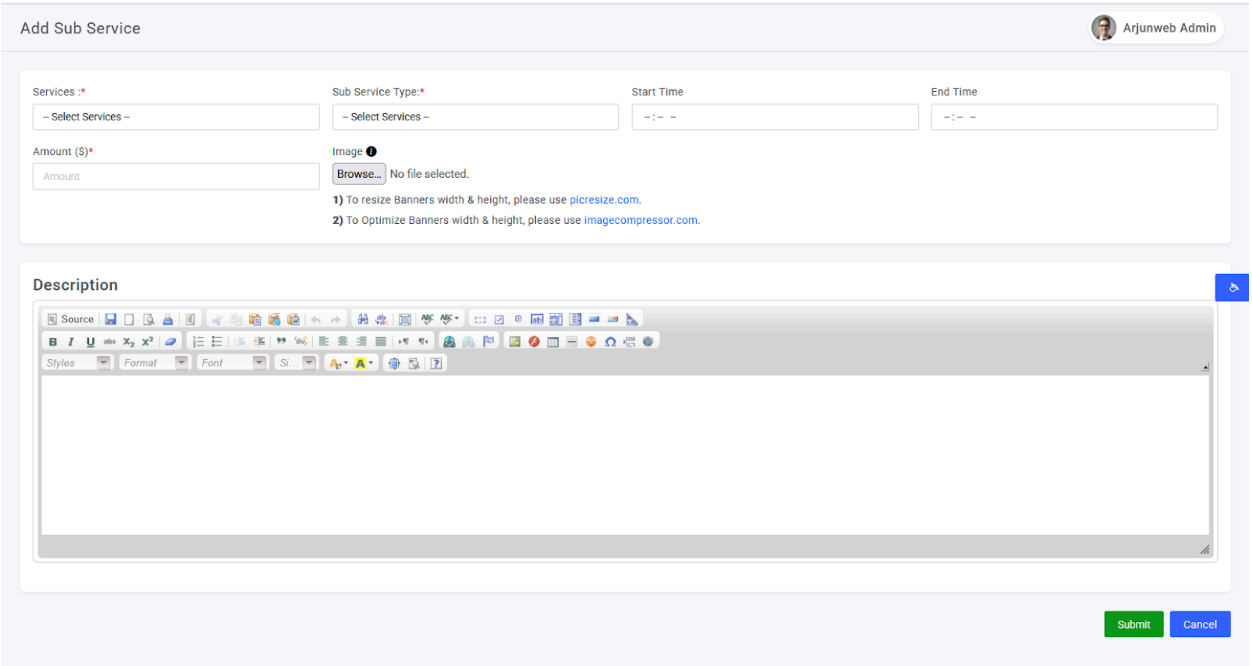

Sub Services :

In the Sub-Services List, you can find the service names, sub-service names, and the assigned amounts for each service. You can manage and assign these details in the Add View section.

1. The **Search** button allows you to filter services and sub-services based on the selected dropdown options.
2. Clicking the **Clear** button will remove the search filters, display all available data, and reset the dropdown values

The **Add +** button will redirect you to the new page called the **Add sub-service**.

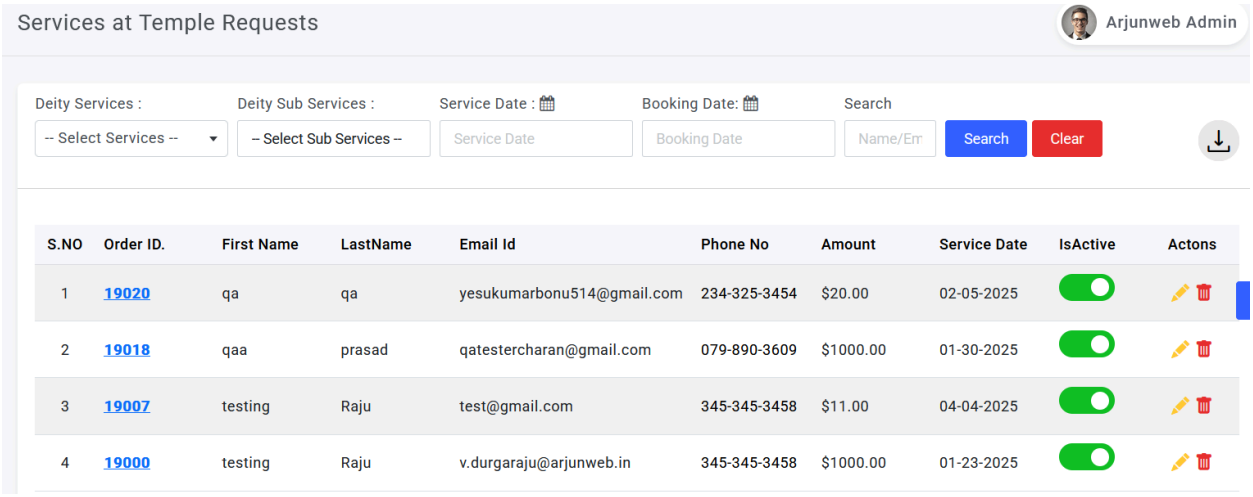

1. **Select Deity Service & Sub-Service Type :** Choose the appropriate deity service and sub-service type from the dropdown lists.
2. **Set Service Duration:** Define the start time and end time for the service.
3. **Enter Service Amount:** Specify the assigned amount for the selected service.
4. **Upload an Image (Optional):** Add an image related to the service if needed.
5. **Add Description (Optional):** Provide additional details about the service if required.

Services at Temple Requests :

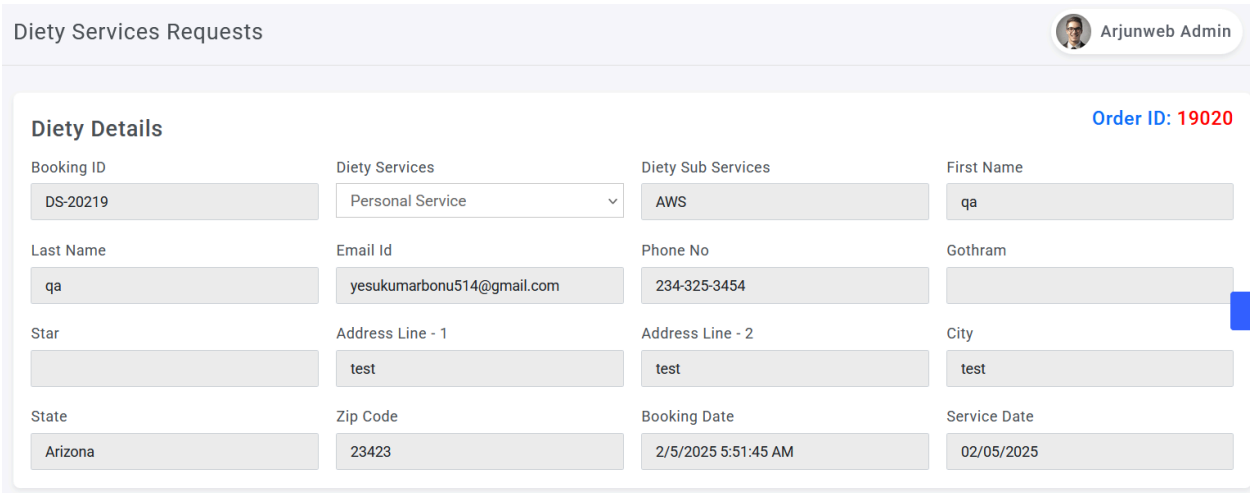

In this list, you can view the details of people who have registered for a particular service, along with their selected time slots.

You can search the list using dropdowns for **services, sub-services, and dates**. Additionally, you can filter the data by **name** or **email** to find specific registrations

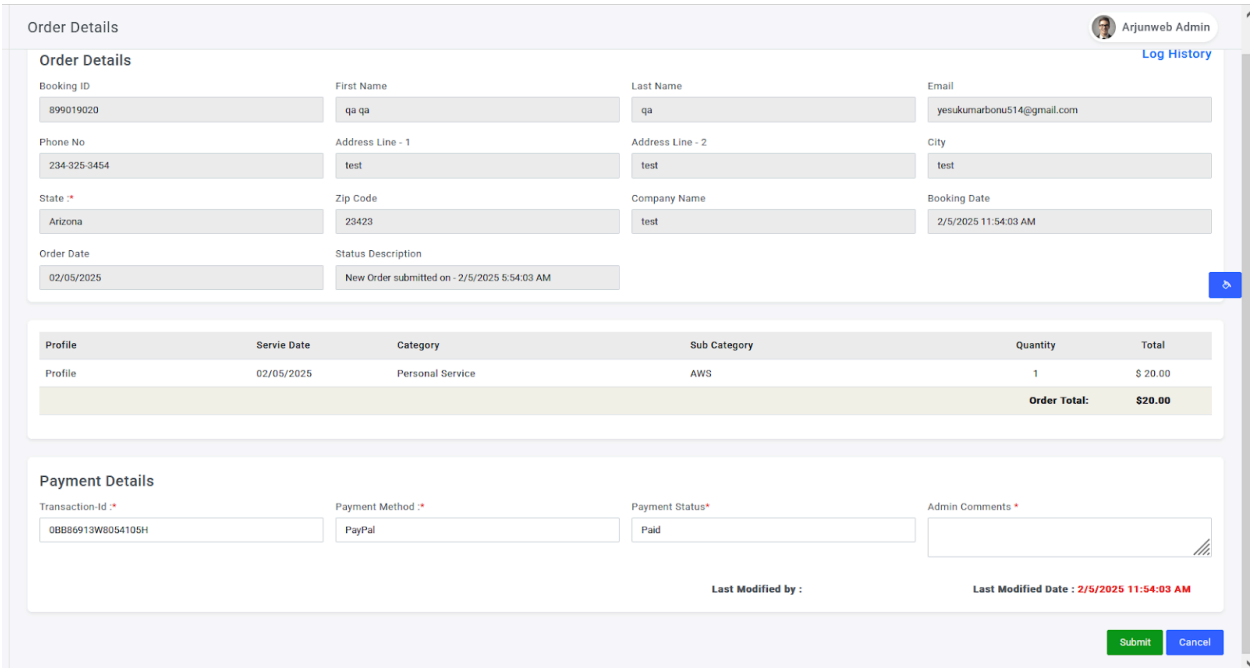

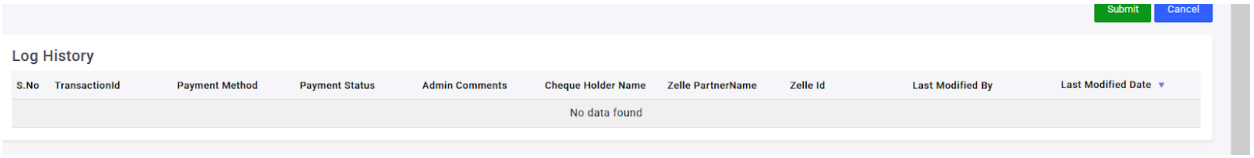

Order ID (Hyperlink) :

The **hyperlink** under the **Order ID** column redirects you to the **Details** View, where you can see the specific user's details along with their unique ID.

In this view, there is another **Order ID hyperlink** that redirects to the complete order details, including **order information, payment details, Log history and all relevant details of the selected service.**

In this view, you can see the **complete order details**, including all relevant information about the selected service. You also have the option to **edit the payment details** as needed. Additionally, at the **top right corner**, The **Log History** hyperlink, when clicked, displays the data as a list in the bottom of the view under the payment details, showing a record of updates and changes made to the order.

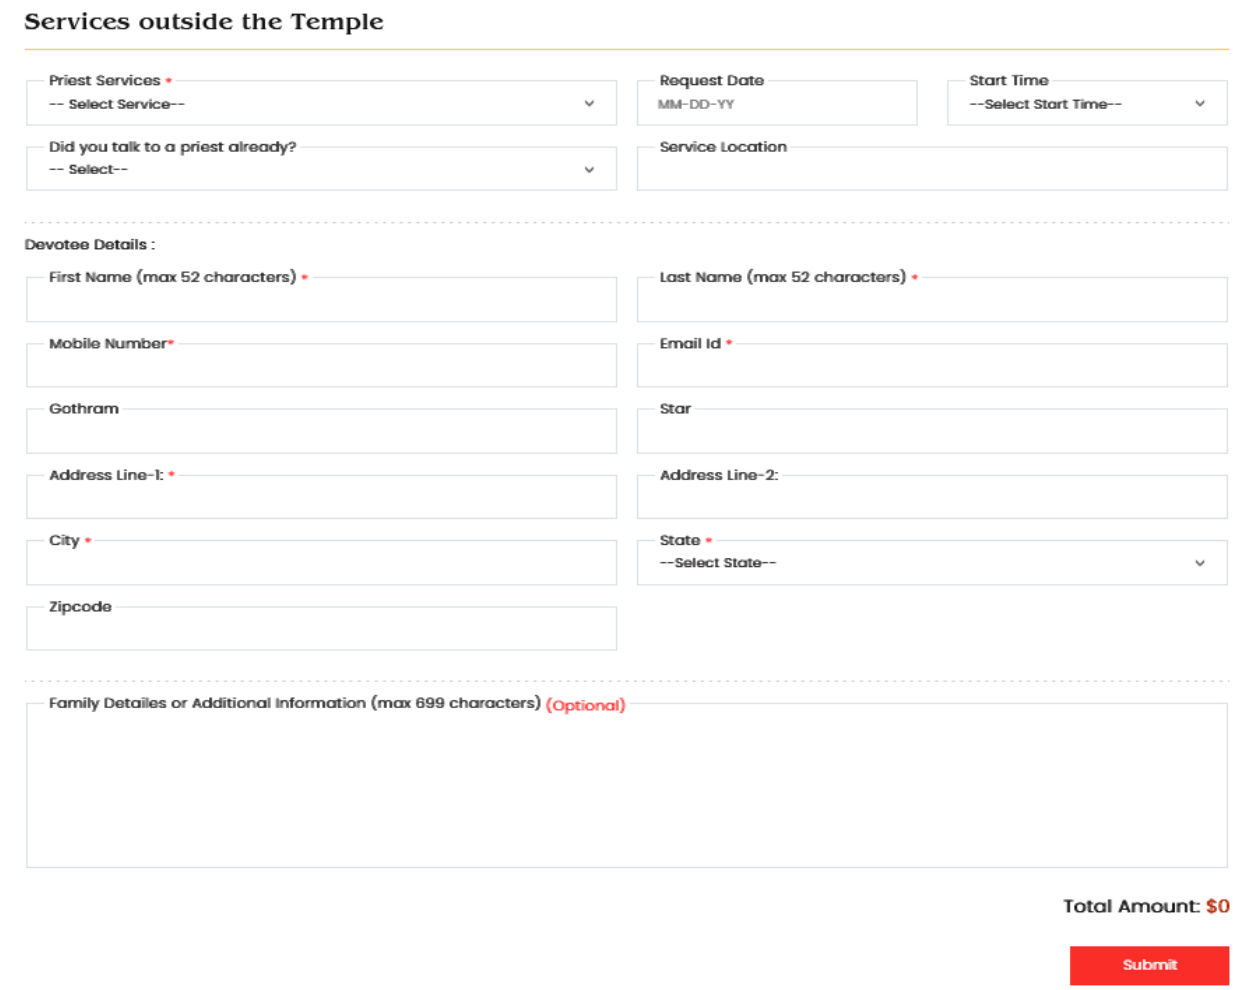

How can we maintain and schedule Priest Services, including services performed outside the temple premises?

On the user side, there is a **form** where you can enter your details, select the **service type**, and choose the **date and time** for the service

User Screen:

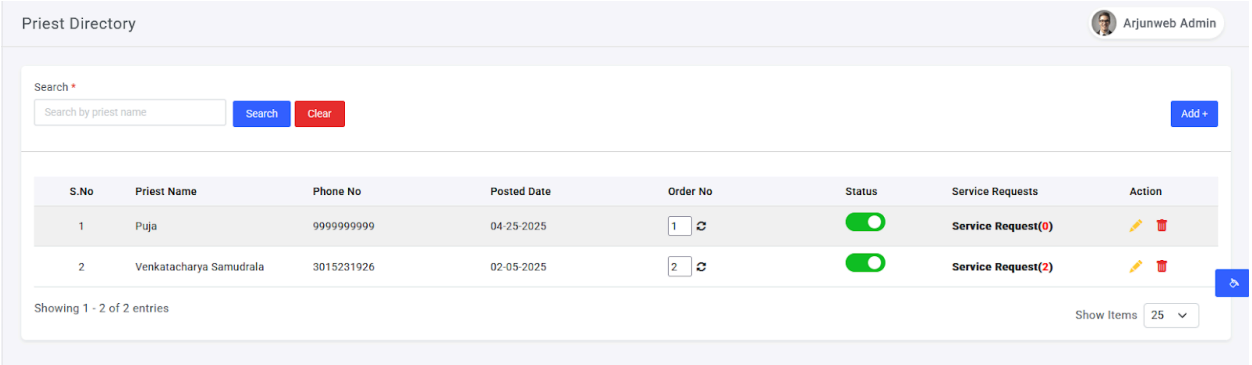

Clicking on **Services Outside the Temple** will redirect you to the **form**, where you can enter your details, select the service type, and choose the date and time.

Our Priests :

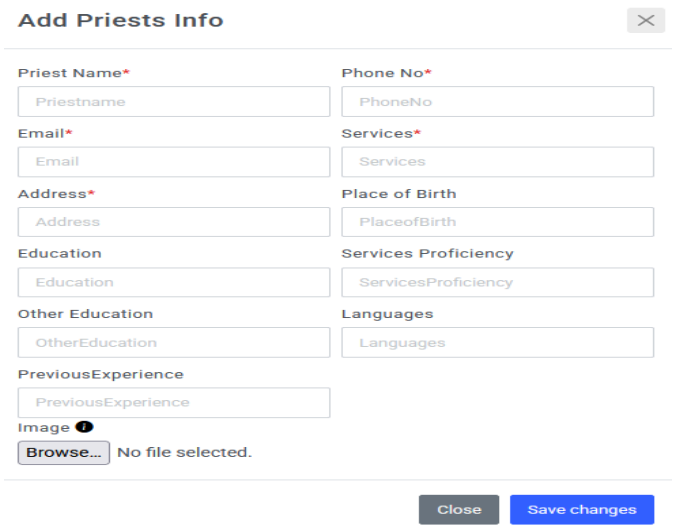

In this list, you can find all the completed details of the priests, including their relevant information and records.

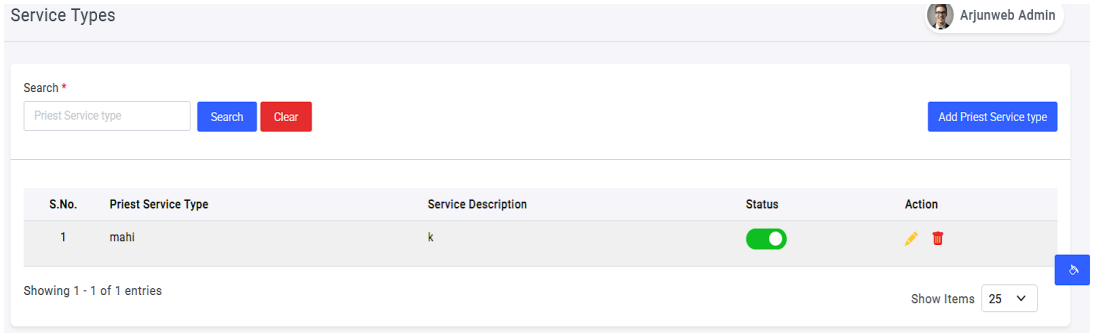

1. **Search Box:** Enter text to search and filter events by their details.

2. Click the **Add +** button to open the **Add Priest Info** and create a new Priest Info.
3. By adding a priest, the priest's details will be reflected in the **user-side front-end form**. There is a **dropdown** in the form where users can select a priest of their choice.

Add Deity Service : This is the view displayed when you click the Add Deity Service.

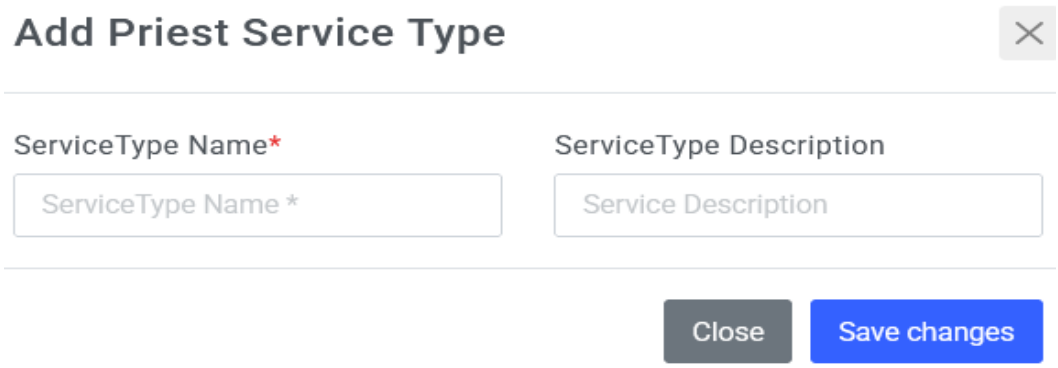

Service types :

In this list, you can find the **priest service types.** This list is used in the services section to define and categorize different **service types.**

1. **Search Box:** Enter text to search and filter service types by their details.
2. Click the **Add Priest Service Type** button to open the **Add Deity Service** and create a new Service.

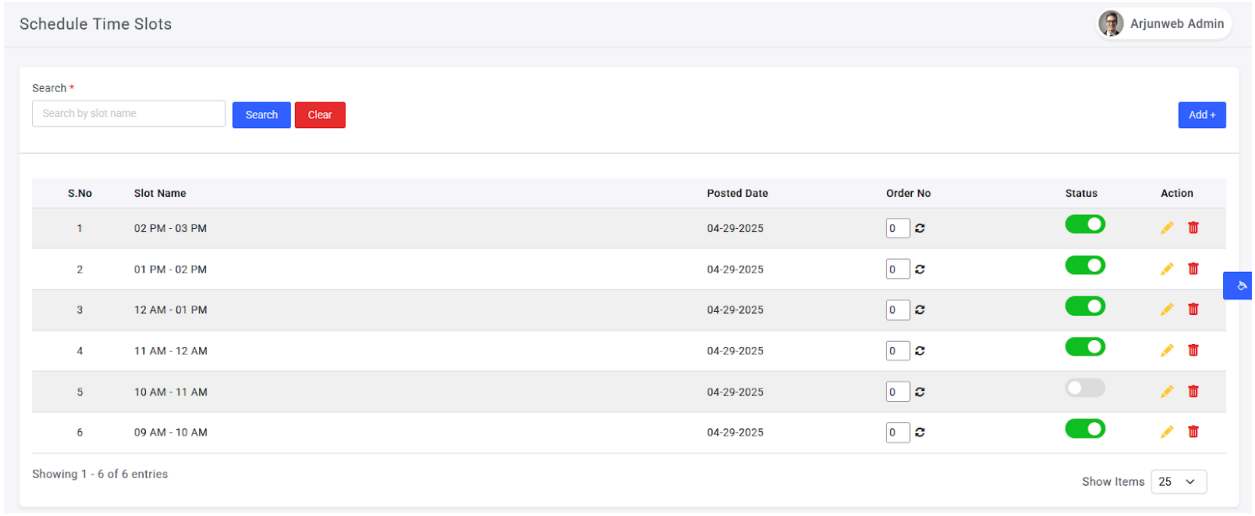

Add Priest Service Type : This is the view displayed when you click the Add Priest Service Type

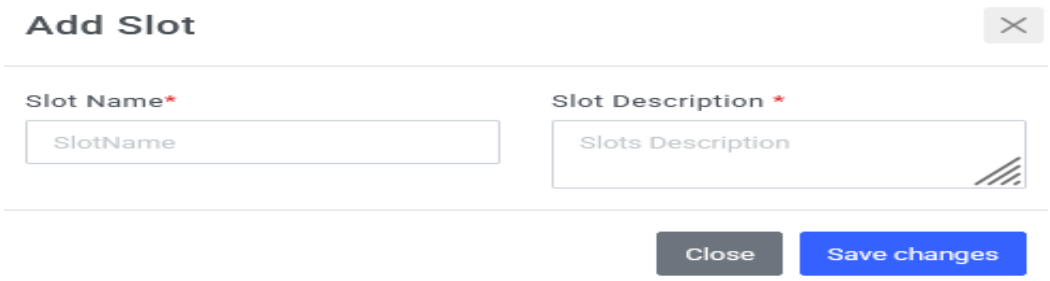

In this section, you can add the **service type name** and **description** as per your requirement.

Master Schedule Slots :

In this list, you can find the available slots, where you can assign specific time slots to priests based on their availability.

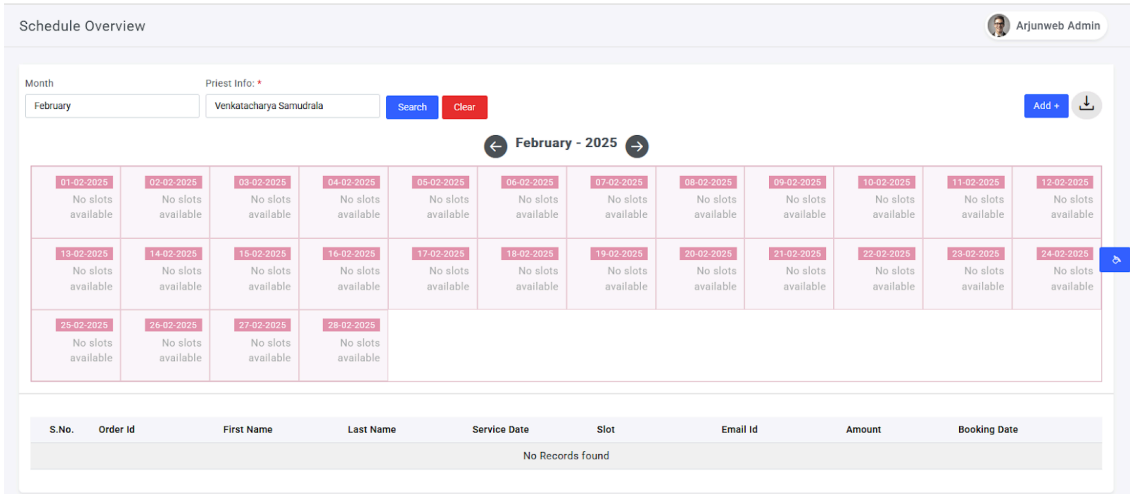

1. **Search Box:** Enter text to search and filter slots timings by their details.
2. By clicking on the Add +, a popup will open where you can enter and add the slot timings.

In this section, you can add the **slot name** and **description** as per your requirement.

Master Schedule :

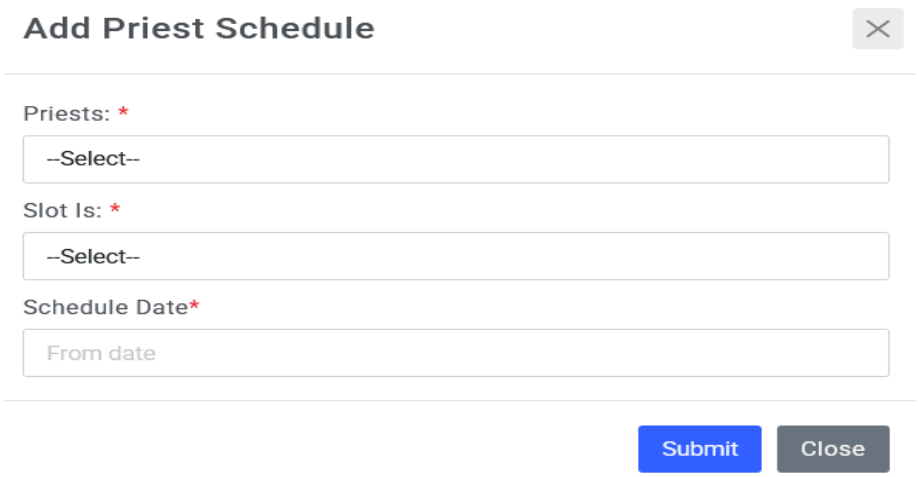

In this list, you can find the **available slots** and their **timings**

1. There are **Month** and **Priest** dropdowns that allow you to search for available slots by selecting the desired month and priest.
2. Clicking on the **Add +** button will redirect you to the view where you can add the **priest's schedule**.
3. There is a **logo with a download symbol**, and by clicking on it, the data will be downloaded in **Excel format**.

Add Priest Schedule :

In this view, you can select the **priest information**, **slot**, and **schedule date** to create or manage the priest's schedule.

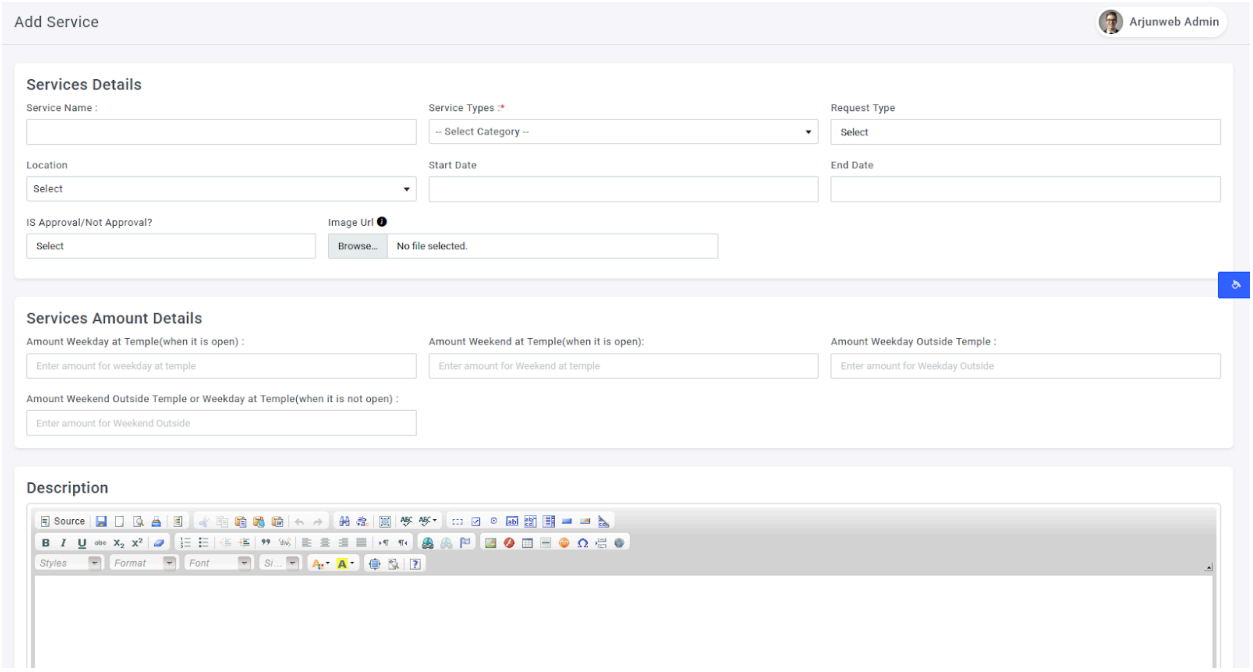

Services :

In this list, you can find the **services** that will be used in the user-side front-end form for selection and booking.

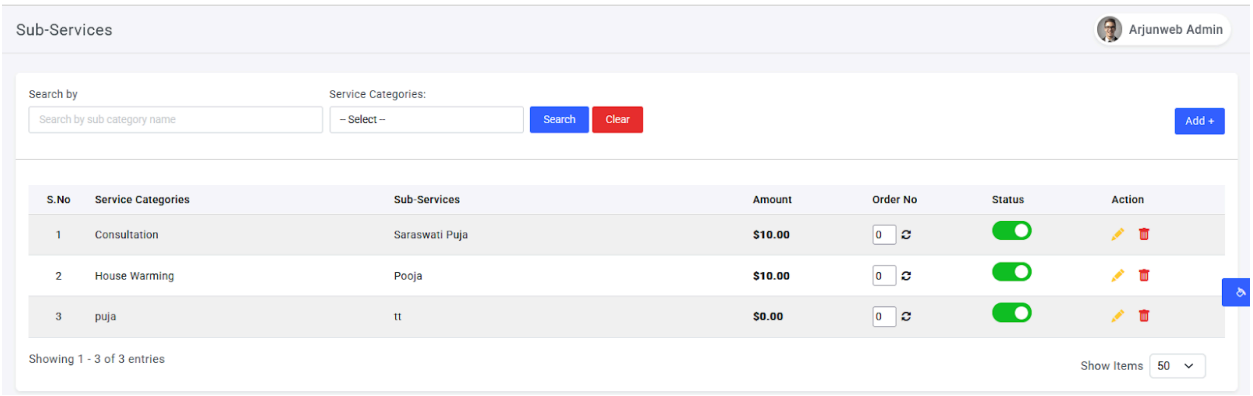

1. **Search Box:** Enter text to search and filter service name by their details.
2. Clicking on the **Add +** page allows you to enter and provide **service details**. As you add the details in this section, they will be reflected in the **user-side form**.

In the **Add Service** section, you can select the **service type, request type, date duration, and amount**, along with other required details. you can also add the **amount information** and add Description if needed

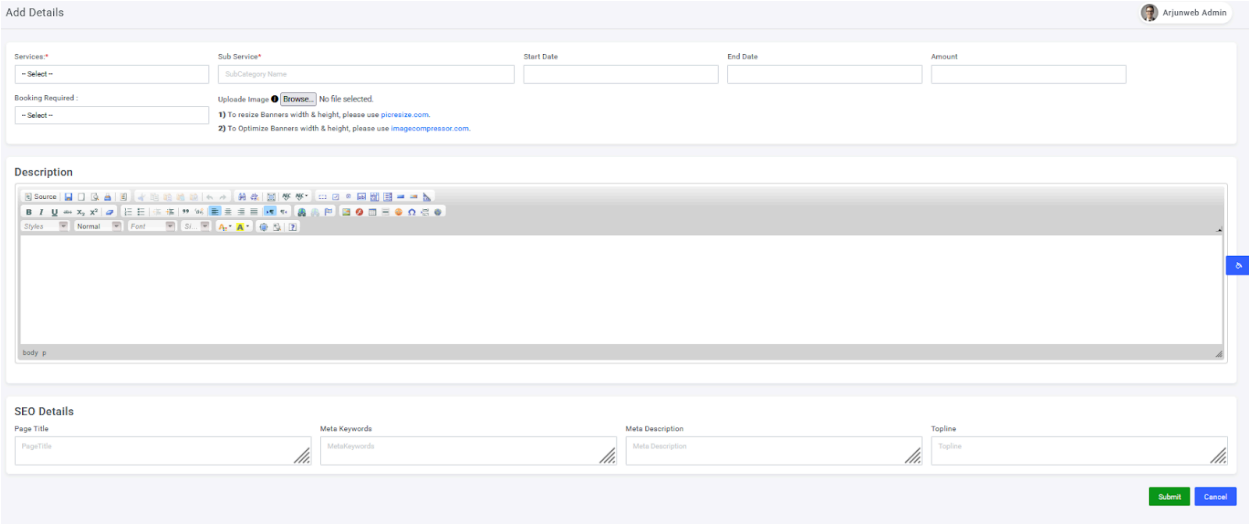

Priest Sub Services :

In this list, you can find the **sub-services** associated with different main **services**.

1. The **Search Box** allows you to enter text to search and filter services by their details. You can also **search by heading** to find specific information. Additionally, the **Services Dropdown** enables you to filter data based on the selected service, making it easier to refine search results.

2. Clicking on the **Add Sub Service** page allows you to enter and provide **service details**. As you add the details in this section, they will be reflected in the **user-side form**.

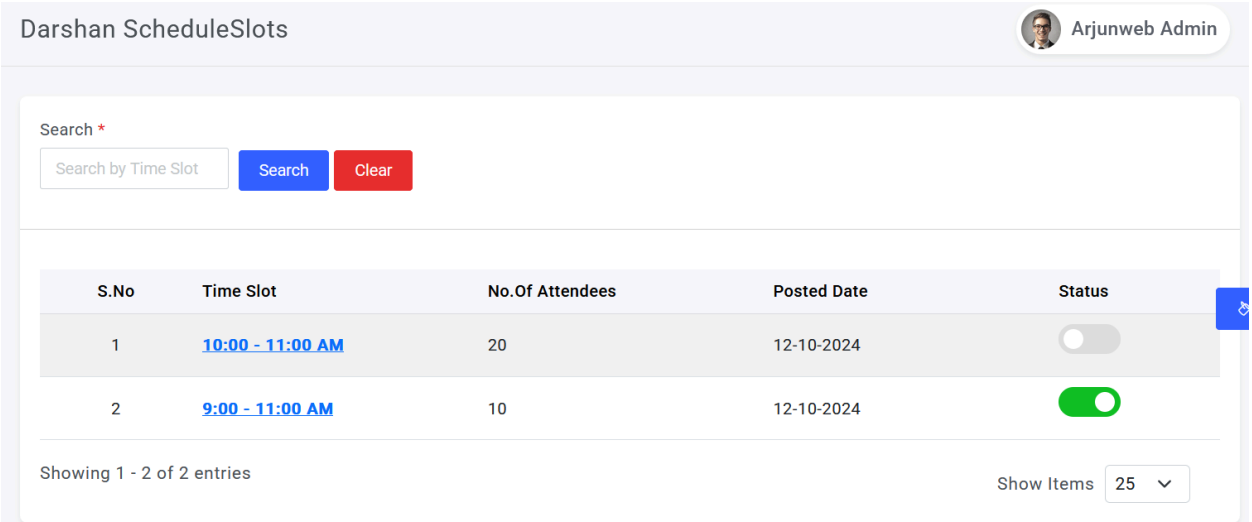

In the **Add Details** view, you can select the **services, sub-services, date, and duration**, specify the **amount**, and add a **description** if needed.

Services outside Temple Requests :

In this list, you can view the details of people who have registered for a particular service, along with their selected time slots.

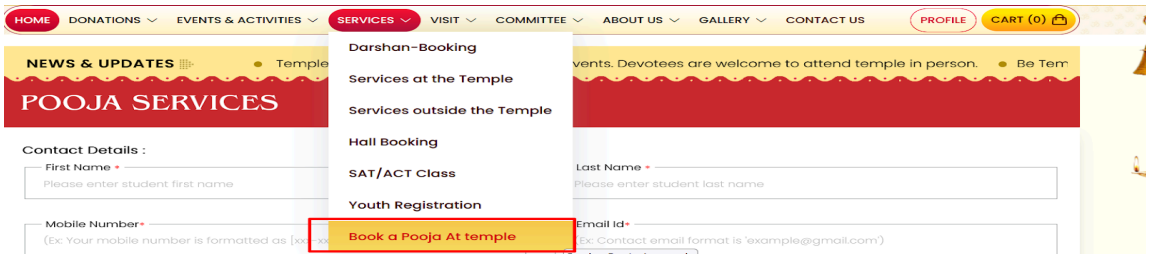

You can search the list using dropdowns for **services, sub-services, and dates**. Additionally, you can filter the data by **name** or **email** to find specific registrations

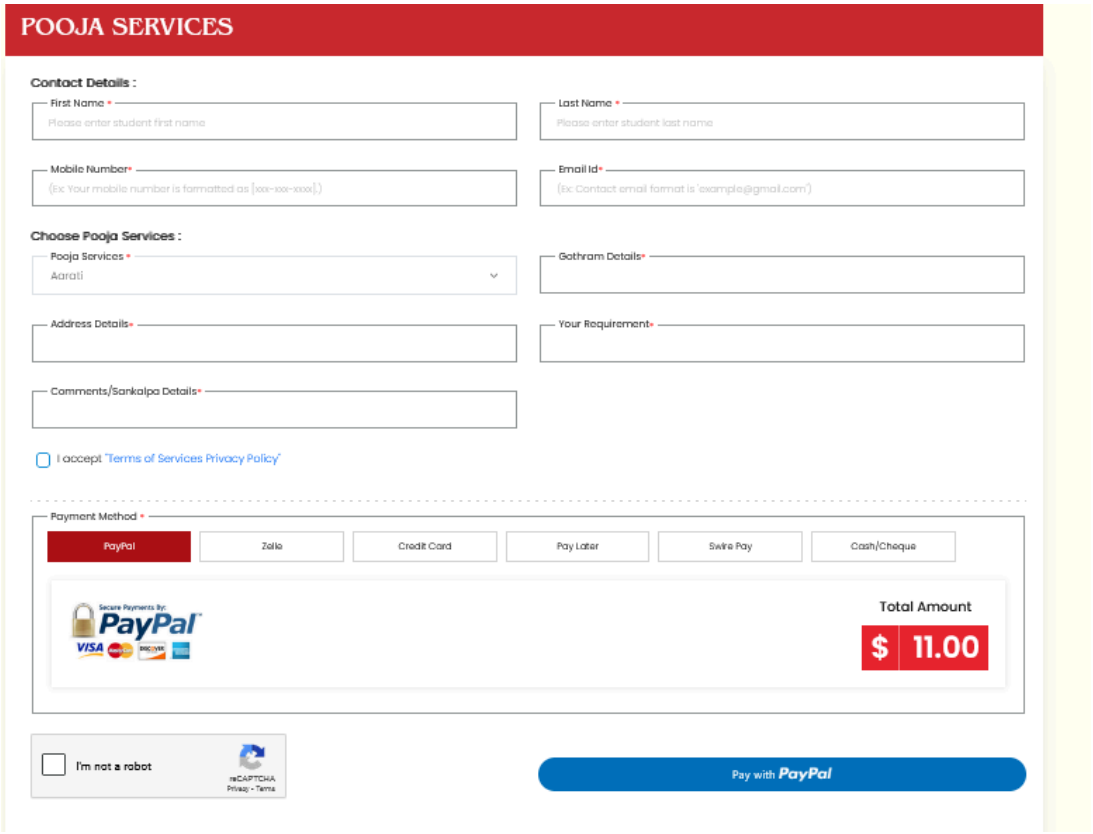

There is a **logo with a download symbol**, and by clicking on it, the data will be downloaded in **Excel format**.

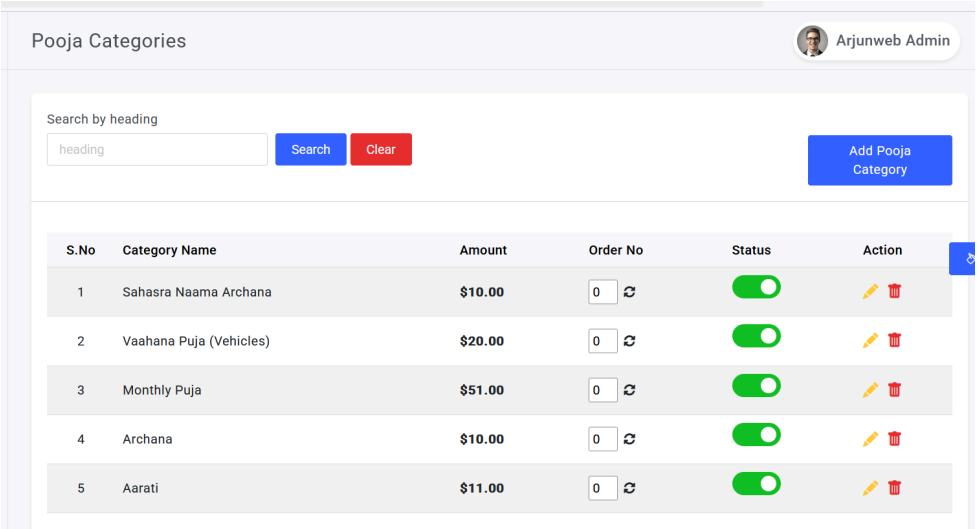

How can we maintain Pooja Services?

On the user side, there is a **form** where you can enter your details, select the **service type**, and choose the **date and time** for the service

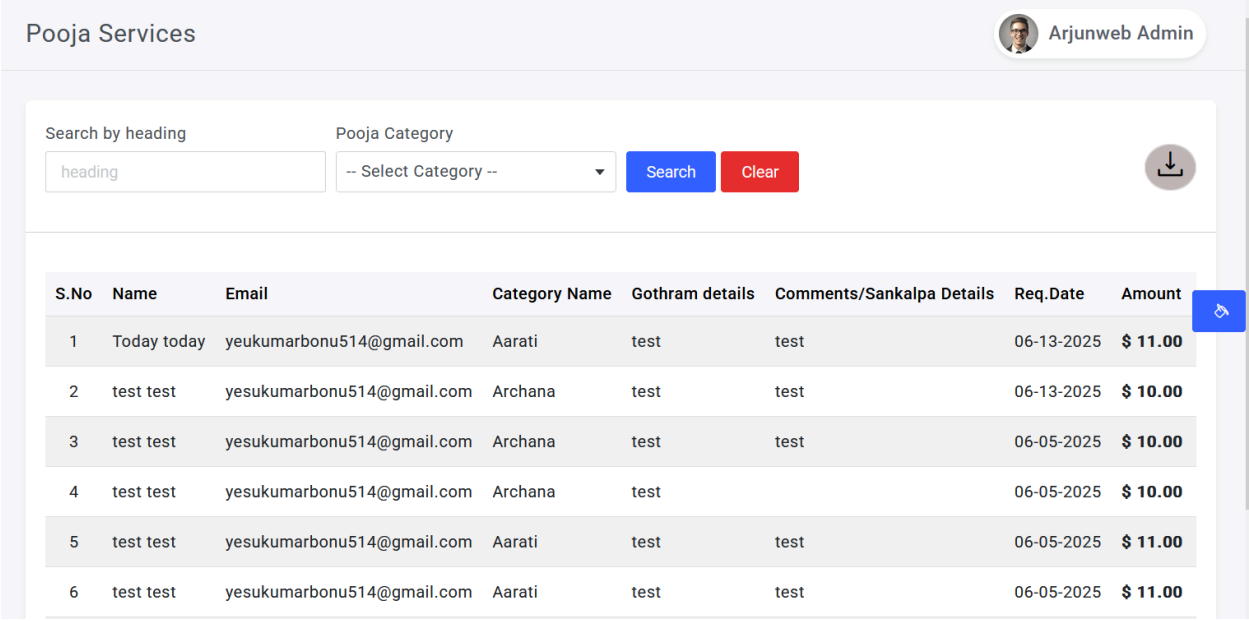

1. **Search Box:** Enter text to search and filter categories by their details.
2. Click the **Add Pooja categories** button to open the **Add Pooja categories** and create new **Pooja categories**.

3. By adding a **Pooja** , the **Pooja** details will be reflected in the **user-side front-end form**. There is a **dropdown** in the form where users can select a **Pooja** of their choice.

In this view, you will find a list of all the people who have **booked Pooja** for a specific date and time.

S.No	Name	Email	Category Name	Gothram details	Comments/Sankalpa Details	Req.Date	Amount
1	Today today	yeukumarbonu514@gmail.com	Aarati	test	test	06-13-2025	$ 11.00

6	test test	yesukumarbonu514@gmail.com	Aarati	test	test	06-05-2025	$ 11.00

1. In this list, you can filter **Pooja requests** by search key word & pooja category
2. There is a **logo with a download symbol**, and by clicking on it, the data will be downloaded in **Excel format**.
3. **Edit Icon:** Redirects to a view for modifying the selected item.
4. **Delete Icon:** Deletes the selected record after confirming the action via an alert.

What is the process for managing Hall Bookings for events and ceremonies?

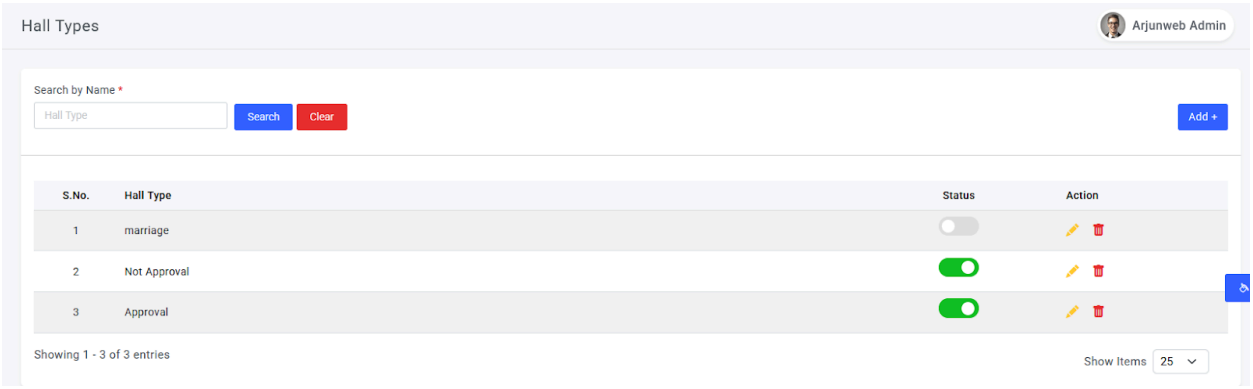

Users can view available halls, their types and durations, and submit requests accordingly. Admin users can manage this data from the backend for seamless scheduling and conflict-free bookings.

How to Add available halls in Hall Booking section:

Step 1: Add Hall Types

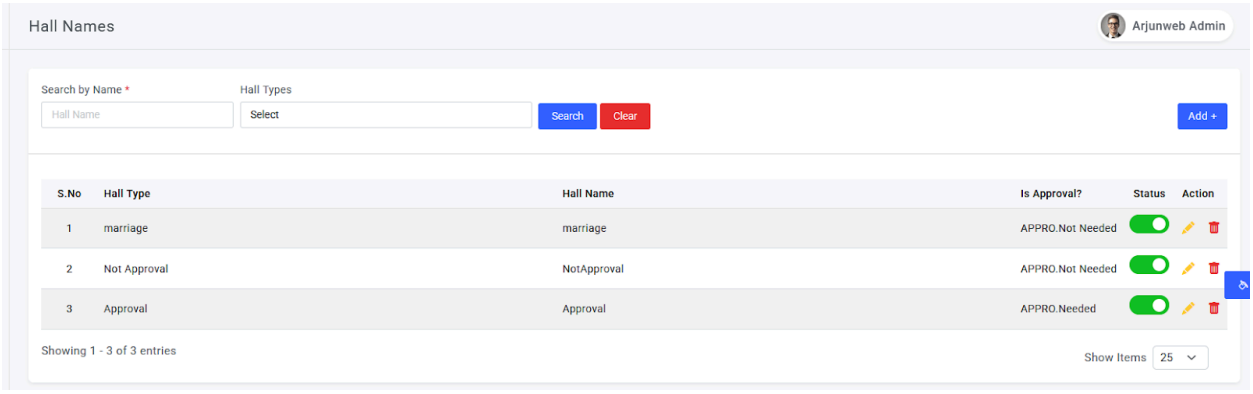

1. Define the **category** or **type** of hall (e.g., Marriage Hall, Meeting Hall, Spiritual Hall).

2. Admins can add/edit/delete types that help users filter halls during booking.

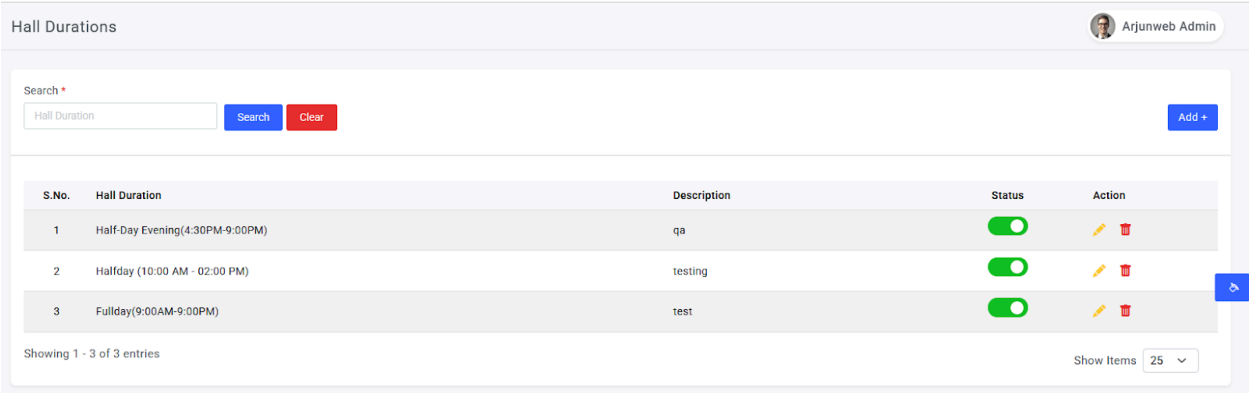

Step 2: Add Hall Names

1. Add the **actual hall names** (e.g., *Sri Lakshmi Convention Hall*).
2. Each hall is associated with a type and used when displaying booking options.
3. Options to **activate/deactivate**, **set order**, and **edit/delete** hall names.

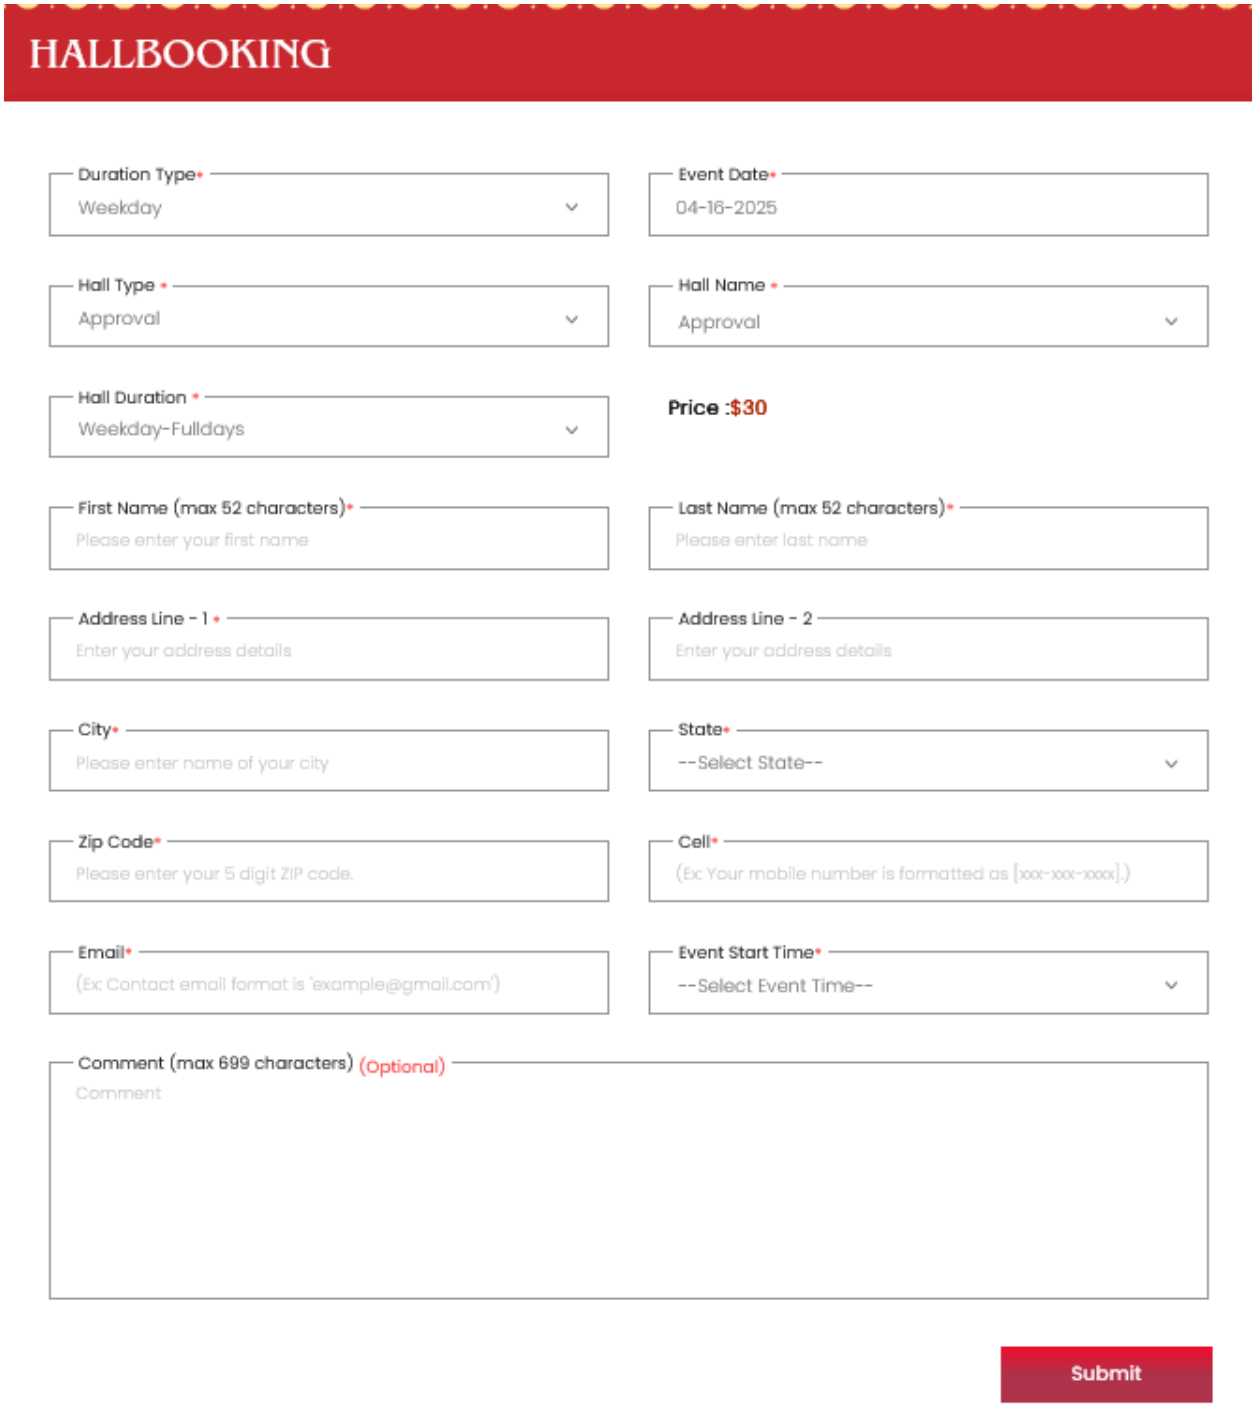

Step 3: Add Hall Duration

1. Configure the **time slots** or **durations** for which a hall can be booked (e.g., 1 Hour, Half Day, Full Day).
2. Duration entries help users choose appropriate slots based on their event needs.

The website provides users the ability to book Halls using Hall Booking Enquiry form, which is integrated into **two scenarios**:

Approval Needed:

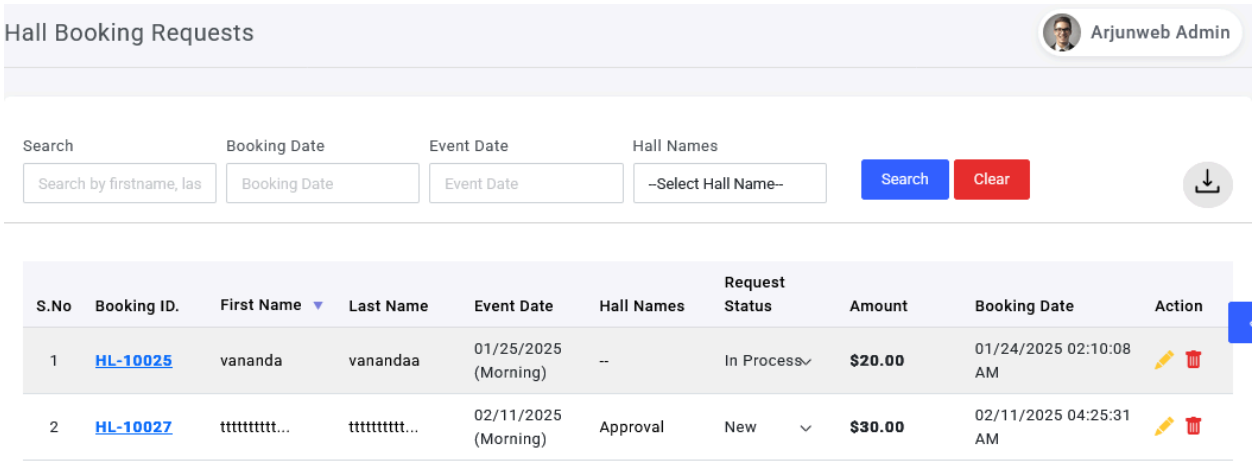

In this scenario, the Booking request requires administrator validation and approval for the selected hall name & dates.

1. **The form captures the following details:**
    - **Event Date:** We used to validate the Event Date calendar based on Duration Types **(weekday / weekend)**.
    - **Hall Selection Flow:**
        - ★ **Hall Names** drop down will be validated based on the **Hall Type** that we have selected like **(Auditorium / multipurpose).**
        - ★ **Hall Booking amount** will be displayed based on the selection of **Hall Name & Duration.**
    - **Devotee Details:** First Name, Last Name, Email, communication details, comments, etc.
    - **Event Start Time**: like **Morning / Evening**.
1. The admin verifies the requested date and checks the selected **hall** availability.
2. If the hall is available, the admin sends an approval email to the devotee.

Approval No Needed:
In this scenario, the Hall Booking request does not require administrator validation and devotees can proceed further.

1. The website provides a streamlined and secure checkout process for Hall booking services.
2. **Secure Payment Gateway Integration:** Support popular and secure payment methods (PayPal, Credit Card, Zelle, Swire Pay...etrc.,)
3. After successful payment, send a **detailed service confirmation** email to the registered email.

In this view, you will find a list of all the people who have **booked halls** for a specific date and time.

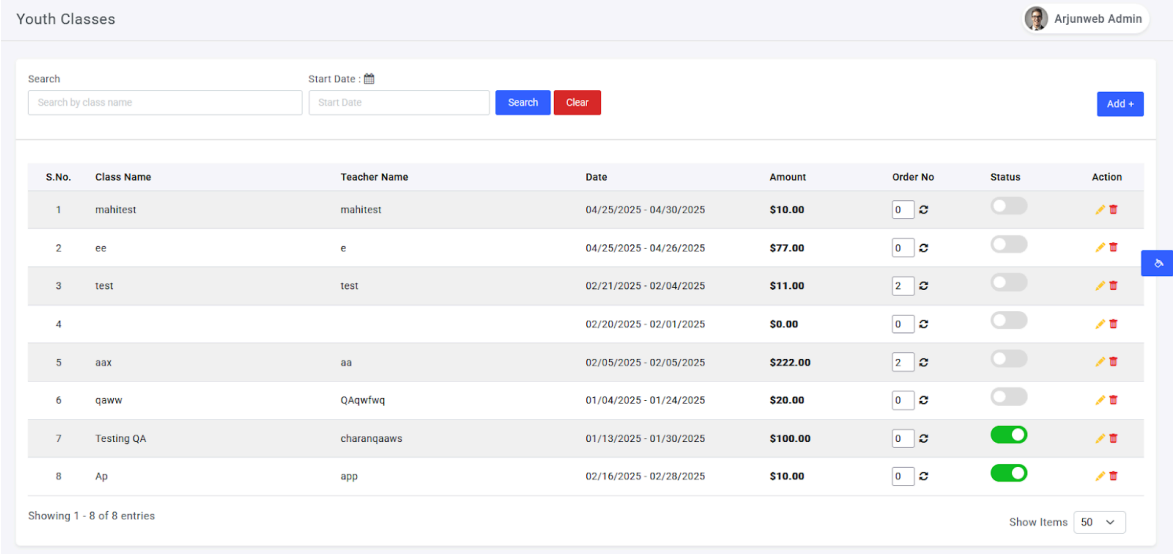

1. In this list, you can filter **booking requests** by name, **booking date**, **event date**, or by selecting a **hall name** from the dropdown.
2. There is a **logo with a download symbol**, and by clicking on it, the data will be downloaded in **Excel format**.

3. The **Request Status** column displays the **status of booking requests.**
4. **Edit Icon:** Redirects to a view for modifying the selected item.
5. **Delete Icon:** Deletes the selected record after confirming the action via an alert.

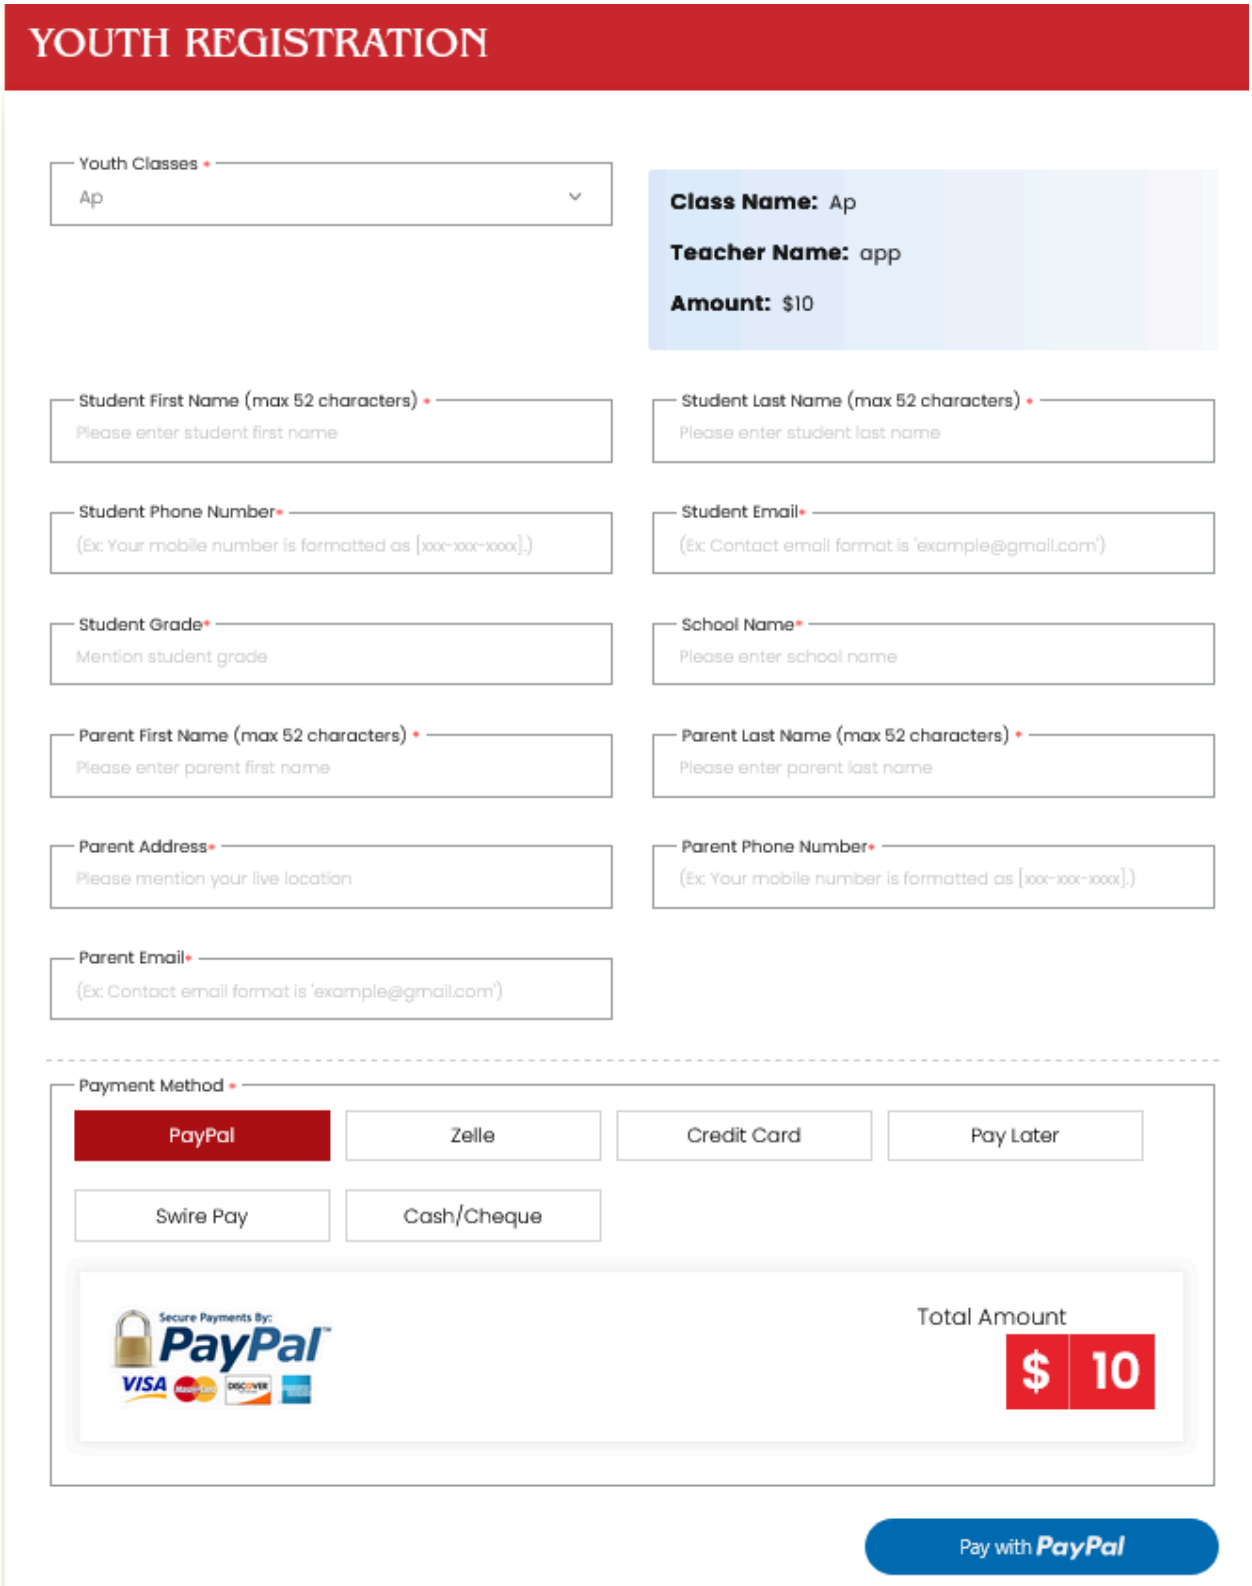

What system do we use for managing Youth Registrations for temple programs and events?

The Youth class module is used to display a list of all Youth classes, where you can assign a name to a specific class name , teacher name and manage its status.

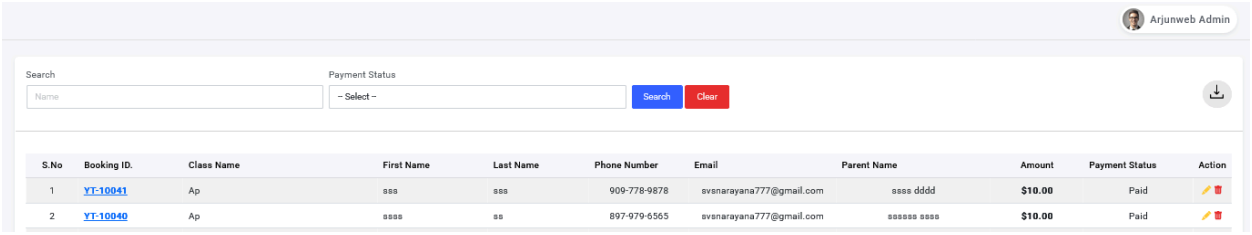

1. **Search Box** : By entering text to search and filter Classes by their names.
2. Click the **Add +** button to open the **Add Youth Class Management** view, where you can create a new **class name**, assign a **teacher**, and set the **date and duration**.

This form is used to **book a Youth Registration** by selecting the **desired class** ,providing **personal details** and **parent details** for the reservation.

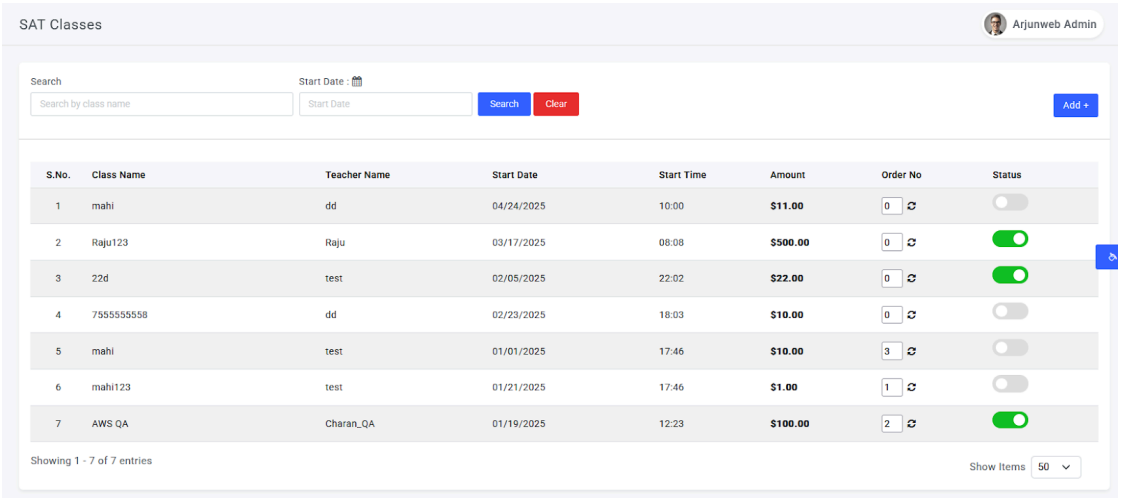

In this view, you will find a list of all the people who have **booked youth** for a specific date and time.

1. In this list, you can filter **youth requests** by search key word & payment status.
2. There is a **logo with a download symbol**, and by clicking on it, the data will be downloaded in **Excel format**.
3. **Edit Icon:** Redirects to a view for modifying the selected item.
4. **Delete Icon:** Deletes the selected record after confirming the action via an alert.

How are SAT/ACT registrations handled and tracked?

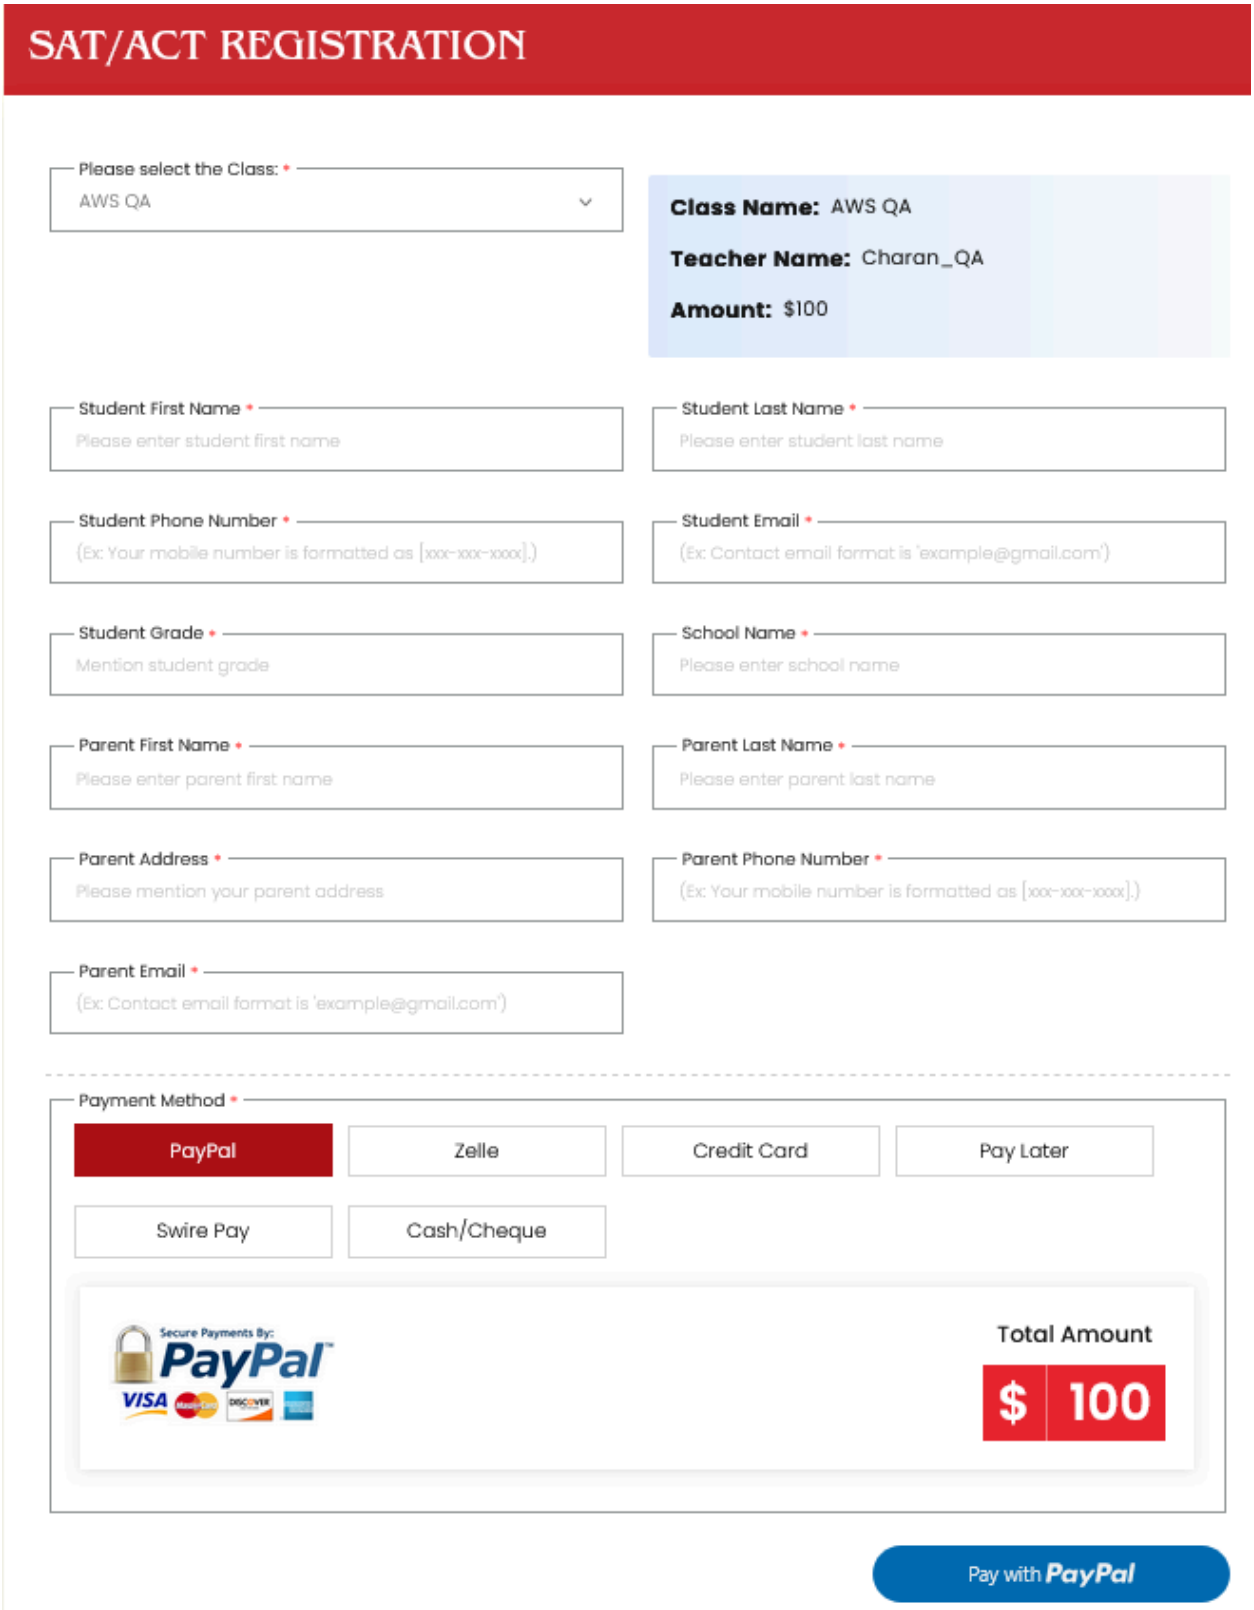

The SAT-ACT class module is used to display a list of all SAT-ACT classes, where you can assign a name to a specific class name, teacher name and manage its status.

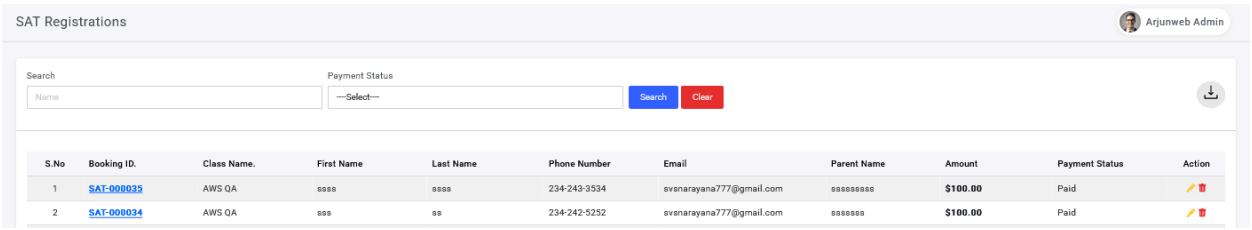

1. **Search Box** : By entering text to search and filter Classes by their names.
2. Click the **Add SAT +** button to open the **Add SAT Class Management** view, where you can create a new **class name**, assign a **teacher**, and set the **date and duration**.

This form is used to book a **SAT-ACT Registration** by selecting the desired **class**, providing **personal and parent details** for the reservation.

When you select a **specific class** from the dropdown, the **class details**, including the **amount, name, and description**, will be displayed.

In this view, you will find a list of all the people who have **booked youth** for a specific date and time.

5. In this list, you can filter **SAT/ACT requests** by search key word & payment status.
6. There is a **logo with a download symbol**, and by clicking on it, the data will be downloaded in **Excel format**.
7. **Edit Icon:** Redirects to a view for modifying the selected item.
